## ILNAS-EN ISO 19901-3:2014

### **Petroleum and natural gas industries - Specific requirements for offshore structures - Part 3: Topsides structure (ISO 19901-3:2014)**

Erdöl- und Erdgasindustrie - Spezielle  
Anforderungen an Offshore-Anlagen - Teil  
3: Topsides structure (ISO 19901-3:2014)

Industries du pétrole et du gaz naturel -  
Exigences spécifiques relatives aux  
structures en mer - Partie 3:  
Superstructures (ISO 19901-3:2014)

12/2014

## National Foreword

This European Standard EN ISO 19901-3:2014 was adopted as Luxembourgish Standard ILNAS-EN ISO 19901-3:2014.

Every interested party, which is member of an organization based in Luxembourg, can participate for FREE in the development of Luxembourgish (ILNAS), European (CEN, CENELEC) and International (ISO, IEC) standards:

- Participate in the design of standards
- Foresee future developments
- Participate in technical committee meetings

## English Version

Petroleum and natural gas industries - Specific requirements for  
offshore structures - Part 3: Topsides structure (ISO 19901-  
3:2014)

Industries du pétrole et du gaz naturel - Exigences  
spécifiques relatives aux structures en mer - Partie 3:  
Superstructures (ISO 19901-3:2014)

Erdöl- und Erdgasindustrie - Spezielle Anforderungen an  
Offshore-Anlagen - Teil 3: Topsides structure (ISO 19901-  
3:2014)

This European Standard was approved by CEN on 4 December 2014.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## Foreword

This document (EN ISO 19901-3:2014) has been prepared by Technical Committee ISO/TC 67 "Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries" in collaboration with Technical Committee CEN/TC 12 "Materials, equipment and offshore structures for petroleum, petrochemical and natural gas industries" the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2015, and conflicting national standards shall be withdrawn at the latest by June 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN ISO 19901-3:2010.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

### Endorsement notice

The text of ISO 19901-3:2014 has been approved by CEN as EN ISO 19901-3:2014 without any modification.

<b>Foreword</b>	<b>v</b>
<b>Introduction</b>	<b>vii</b>
<b>1 Scope</b>	<b>1</b>
<b>2 Normative references</b>	<b>2</b>
<b>3 Terms and definitions</b>	<b>2</b>
<b>4 Symbols and abbreviated terms</b>	<b>6</b>
4.1 Symbols	6
4.2 Abbreviated terms	8
<b>5 Overall considerations</b>	<b>9</b>
5.1 Design situations	9
5.2 Codes and standards	9
5.3 Deck elevation and green water	10
5.4 Exposure level	10
5.5 Operational considerations	10
5.6 Selecting the design environmental conditions	11
5.7 Assessment of existing topsides structures	11
5.8 Reuse of topsides structure	11
5.9 Modifications and refurbishment	11
<b>6 Design requirements</b>	<b>11</b>
6.1 General	11
6.2 Materials selection	11
6.3 Design conditions	11
6.4 Structural interfaces	12
6.5 Design for serviceability limit states (SLS)	12
6.6 Design for ultimate limit states (ULS)	14
6.7 Design for fatigue limit states (FLS)	15
6.8 Design for accidental limit states (ALS)	15
6.9 Robustness	15
6.10 Corrosion control	16
6.11 Design for fabrication and inspection	16
6.12 Design considerations for structural integrity management	17
6.13 Design for decommissioning, removal and disposal	17
<b>7 Actions</b>	<b>17</b>
7.1 General	17
7.2 In-place actions	18
7.3 Action factors	20
7.4 Vortex-induced vibrations	21
7.5 Deformations	21
7.6 Wave and current actions	22
7.7 Wind actions	22
7.8 Seismic actions	22
7.9 Actions during fabrication and installation	24
7.10 Accidental situations	24
7.11 Other actions	34
<b>8 Strength and resistance of structural components</b>	<b>36</b>
8.1 Use of local building standards	36
8.2 Cylindrical tubular member design	36
8.3 Design of non-cylindrical sections	37
8.4 Connections	37
8.5 Castings	38
<b>9 Structural systems</b>	<b>39</b>

9.1	Topsides design .....	39
9.2	Topsides structure design models .....	39
9.3	Support structure interface .....	40
9.4	Flare towers, booms, vents and similar structures .....	40
9.5	Helicopter landing facilities (helidecks) .....	41
9.6	Crane support structure .....	44
9.7	Derrick design .....	47
9.8	Bridges .....	47
9.9	Bridge bearings .....	48
9.10	Anti-vibration mountings for modules and major equipment skids .....	48
9.11	System interface assumptions .....	48
9.12	Fire protection systems .....	49
9.13	Penetrations .....	49
9.14	Difficult-to-inspect areas .....	49
9.15	Drainage .....	49
9.16	Actions due to drilling operations .....	49
9.17	Strength reduction due to heat .....	49
9.18	Walkways, laydown areas and equipment maintenance .....	50
9.19	Muster areas and lifeboat stations .....	50
<b>10</b>	<b>Materials .....</b>	<b>50</b>
10.1	General .....	50
10.2	Carbon steel .....	51
10.3	Stainless steel .....	53
10.4	Aluminium alloys .....	54
10.5	Fibre-reinforced composites .....	55
10.6	Timber .....	55
<b>11</b>	<b>Fabrication, quality control, quality assurance and documentation .....</b>	<b>55</b>
11.1	Assembly .....	55
11.2	Welding .....	56
11.3	Fabrication inspection .....	56
11.4	Quality control, quality assurance and documentation .....	56
11.5	Corrosion protection .....	57
<b>12</b>	<b>Corrosion control .....</b>	<b>57</b>
12.1	General .....	57
12.2	Forms of corrosion, associated corrosion rates and corrosion damage .....	57
12.3	Design of corrosion control .....	57
12.4	Fabrication and installation of corrosion control .....	58
12.5	In-service inspection, monitoring and maintenance of corrosion control .....	59
<b>13</b>	<b>Loadout, transportation and installation .....</b>	<b>59</b>
<b>14</b>	<b>In-service inspection and structural integrity management .....</b>	<b>60</b>
14.1	General .....	60
14.2	Particular considerations applying to topsides structures .....	60
14.3	Topsides structure default inspection scopes .....	61
<b>15</b>	<b>Assessment of existing topsides structures .....</b>	<b>62</b>
<b>16</b>	<b>Reuse of topsides structure .....</b>	<b>63</b>
<b>Annex A (informative) Additional information and guidance .....</b>		<b>64</b>
<b>Annex B (informative) Example calculation of building code correspondence factor .....</b>		<b>108</b>
<b>Annex C (informative) Regional information .....</b>		<b>114</b>
<b>Bibliography .....</b>		<b>115</b>
