16	Information security incident management	13
16.1	Management of information security incidents and improvements.....	13
16.1.1	Responsibilities and procedures.....	13
16.1.2	Reporting information security events.....	13
16.1.3	Reporting information security weaknesses.....	13
16.1.4	Assessment of and decision on information security events.....	13
16.1.5	Response to information security incidents.....	14
16.1.6	Learning from information security incidents.....	14
16.1.7	Collection of evidence.....	14
17	Information security aspects of business continuity management	14
18	Compliance	14
18.1	Compliance with legal and contractual requirements.....	14
18.2	Information security reviews.....	14
18.2.1	Independent review of information security.....	14
18.2.2	Compliance with security policies and standards.....	14
18.2.3	Technical compliance review.....	14

Annex A (normative) Public cloud PII processor extended control set for PII protection.....15
Bibliography.....23

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*.

This second edition cancels and replaces the first edition (ISO/IEC 27018:2014), of which it constitutes a minor revision. The main change compared to the previous edition is the correction of an editorial mistake in [Annex A](#).

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
