de l'accréditation, de la sécurité et qualité
des produits et services

ILNAS-EN 50499:2019

**Procedure for the assessment of the
exposure of workers to
electromagnetic fields**

Procédure pour l'évaluation de
l'exposition des travailleurs aux champs
électromagnétiques

Verfahren für die Beurteilung der
Exposition von Arbeitnehmern
gegenüber elektromagnetischen Feldern

10/2019

National Foreword

This European Standard EN 50499:2019 was adopted as Luxembourgish Standard ILNAS-EN 50499:2019.

Every interested party, which is member of an organization based in Luxembourg, can participate for FREE in the development of Luxembourgish (ILNAS), European (CEN, CENELEC) and International (ISO, IEC) standards:

- Participate in the design of standards
- Foresee future developments
- Participate in technical committee meetings

EUROPEAN STANDARD ^{ILNAS-EN 50499:2019} **EN 50499**
NORME EUROPÉENNE
EUROPÄISCHE NORM

October 2019

ICS 17.240

Supersedes EN 50499:2008 and all of its amendments
and corrigenda (if any)

English Version

**Procedure for the assessment of the exposure of workers to
electromagnetic fields**

Procédure pour l'évaluation de l'exposition des travailleurs
aux champs électromagnétiques

Verfahren für die Beurteilung der Exposition von
Arbeitnehmern gegenüber elektromagnetischen Feldern

This European Standard was approved by CENELEC on 2019-08-20. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Contents

European foreword	4
1 Scope	5
2 Normative references	5
3 Terms and definitions	6
4 General considerations on assessment	8
4.1 Introduction	8
4.2 Overview of risk assessment procedure	8
4.3 Indirect effects	14
4.4 Uncertainty for assessments using Clauses 7, 8 and 9	15
5 Initial assessment	15
6 Workplaces likely to require further assessment	19
7 Standards for specific workplaces	20
8 Methodology for assessing workplace exposure by comparison with the action levels	20
9 Methodology for assessing workplace exposure by comparison with the exposure limit values ..	21
10 Methodology for taking measures	22
11 End of assessment	23
Annex A (normative) Other health and safety issues: indirect effects of fields and workers at particular risk	24
A.1 Introduction	24
A.2 Indirect effects of fields on workers	24
A.3 Indirect effects on workers with medical devices	24
A.4 Indirect effects on equipment and materials	25
A.5 Pregnant workers	25
A.6 Zoning	25
Annex B (informative) Documenting the risk assessment	26
B.1 General	26
B.2 Form 1: Workplace containing only equipment in Table 1	26
B.2.1 General information	26
B.2.2 Assessment	26
B.3 Form 2: Workplace requiring detailed risk assessment	27
B.3.1 General information	27
B.3.2 Assessment	27
Annex C (informative) CE-marked equipment	28
C.1 CE-marked equipment	28
C.2 Identifying equipment that has been assessed	29
Annex D (informative) Simultaneous exposure to multiple frequencies and multiple sources	30
D.1 Terms and definitions	30
D.1.1 Exposure Ratio (<i>ER</i> or <i>ER</i> %)	30

D.1.2	Total Exposure Ratio (<i>TER</i> or <i>TER</i> %)	30
D.2	The <i>TER</i> approach	30
D.2.1	Explanation	30
D.2.2	<i>ER</i> for a single item of equipment	31
D.2.2.1	Obtaining or calculating the <i>ER</i> for a single item of equipment	31
D.2.2.2	Calculating single equipment <i>ER</i> from measured emission or exposure levels for non-thermal effects (below 10 MHz)	31
D.2.2.2.1	Simultaneous exposure to multiple frequency fields	31
D.2.2.2.2	Weighted peak method in time domain	31
D.2.2.3	Calculating single equipment <i>ER</i> from measured emission or exposure levels for thermal effects (above 100 kHz)	32
D.2.3	Combining the separate equipment <i>ERs</i> into a <i>TER</i>	33
D.2.3.1	Simple assessment of the <i>TER</i>	33
D.2.3.2	Assessment of low frequency (non-thermal effects)	33
D.2.3.3	Assessment of high frequency (thermal effects)	33
D.2.3.4	Assessment of intermediate frequencies 100 kHz to 10 MHz, or if the applicable frequency of measurement assessments covers both the stimulation effects and thermal effects, or is unknown	34
D.3	Example of multiple exposure using separate <i>TER</i> assessments	34
	Annex E (informative) Zoning	35
E.1	Introduction	35
E.2	Workplace zones	35
E.3	Implementation of zoning	35
	Bibliography	37
