### **Small craft - Hull construction and scantlings - Part 10: Rig loads and rig attachment in sailing craft (ISO 12215-10:2020)**

Petit navires - Construction de la coque et  
échantillonnage - Partie 10: Charges dans  
le gréement et points d'attache du  
gréement dans les bateaux à voiles (ISO

Kleine Wasserfahrzeuge -  
Rumpfbauweise und Dimensionierung -  
Teil 10: Tagelagelasten und  
Takelagezubehör von Segelbooten (ISO

## National Foreword

This European Standard EN ISO 12215-10:2020 was adopted as Luxembourgish Standard ILNAS-EN ISO 12215-10:2020.

Every interested party, which is member of an organization based in Luxembourg, can participate for FREE in the development of Luxembourgish (ILNAS), European (CEN, CENELEC) and International (ISO, IEC) standards:

- Participate in the design of standards
- Foresee future developments
- Participate in technical committee meetings

NORME EUROPÉENNE

EUROPÄISCHE NORM

November 2020

ICS 47.080

English Version

**Small craft - Hull construction and scantlings - Part 10: Rig loads and rig attachment in sailing craft (ISO 12215-10:2020)**

Petit navires - Construction de la coque et échantillonnage - Partie 10: Charges dans le gréement et points d'attache du gréement dans les bateaux à voiles (ISO 12215-10:2020)

Kleine Wasserfahrzeuge - Rumpfbauweise und Dimensionierung - Teil 10: Takelagelasten und Takelagezubehör von Segelbooten (ISO 12215-10:2020)

This European Standard was approved by CEN on 22 February 2020.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## European foreword

This document (EN ISO 12215-10:2020) has been prepared by Technical Committee ISO/TC 188 "Small craft" in collaboration with CCMC.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2021, and conflicting national standards shall be withdrawn at the latest by May 2021.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Endorsement notice

The text of ISO 12215-10:2020 has been approved by CEN as EN ISO 12215-10:2020 without any modification.

| <b>Foreword</b>  | <b>v</b>  |
| <b>Introduction</b>  | <b>vi</b> |
| <b>1 Scope</b>   | <b>1</b>  |
| <b>2 Normative references</b>  | <b>1</b>  |
| <b>3 Terms and definitions</b>   | <b>1</b>  |
| <b>4 Symbols</b>   | <b>3</b>  |
| <b>5 Application of the document</b>   | <b>4</b>  |
| 5.1 General  | 4         |
| 5.2 The simplified method  | 4         |
| 5.3 The developed method   | 4         |
| 5.4 Steps of the methods and corresponding clauses of this document  | 5         |
| <b>6 Simplified and developed methods — Design stresses</b>  | <b>6</b>  |
| 6.1 General  | 6         |
| 6.2 Design load vs safety factor   | 7         |
| <b>7 Developed method — General assessments, design moment</b>   | <b>8</b>  |
| 7.1 General  | 8         |
| 7.1.1 General topics on rigging design   | 8         |
| 7.1.2 Sail configurations:   | 9         |
| 7.1.3 Rigging loads and adjustment information to be provided  | 9         |
| 7.2 Design moment $M_D$ : righting or heeling moment   | 10        |
| 7.2.1 General  | 10        |
| 7.2.2 Principle of design  | 10        |
| 7.2.3 Topics on multihulls/form stable sailing craft corresponding to case b) i.e. with $M_{H1} < M_{RUP1}$  | 13        |
| 7.2.4 Downwind longitudinal force $F_{ADOWN}$ and nose trimming moment $M_{HDOWN}$ , running under spinnaker alone — "Normal" ( $S_{c6}$ ) or "exceptional" ( $S_{c8}$ ) | 14        |
| 7.2.5 Maximum righting moment $M_{RMAX}$ , exceptional case, reaching under spinnaker  | 14        |
| 7.2.6 Heeling force $F_{ABROACH}$ and heeling moment $M_{HBROACH}$ while broaching under spinnaker, exceptional case   | 14        |
| 7.2.7 Minimum sail configuration and righting/heeling moment to be analyzed  | 14        |
| 7.3 Rig dimensions, and default values for areas, forces and points of application   | 15        |
| 7.4 Wing masts   | 21        |
| 7.5 Resultant forces in sails  | 22        |
| <b>8 Loads in rigging elements — Developed method</b>  | <b>23</b> |
| 8.1 General  | 23        |
| 8.2 Force in forestay, inner forestay, mainsail leech and on halyards  | 23        |
| 8.2.1 General  | 23        |
| 8.2.2 Force in forestay, inner forestay, mainsail leech and on halyards connected with sag   | 24        |
| 8.2.3 Force in forestay to balance the longitudinal component of forces from aft set shrouds, fixed/running backstays, mainsail leech                                    | 24        |
| 8.3 Force in backstay, running backstays, or equivalent  | 24        |
| 8.3.1 General  | 24        |
| 8.3.2 Fractional rig with fixed backstay, no running backstay and aft angled spreaders   | 25        |
| 8.3.3 Case of rigs without fixed nor running backstay  | 25        |
| 8.4 Compression in the mast step/pillar  | 27        |
| 8.4.1 General  | 27        |
| 8.4.2 Initial mast compression due to pre-stressing  | 27        |

|                              |  |           |
|------------------------------|--|-----------|
| 8.4.3                        | Mast compression due to heeling or broaching.....  | 28        |
| 8.4.4                        | Design compression in the mast step/pillar.....  | 28        |
| 8.4.5                        | Detail topics on mast step/pillar.....   | 28        |
| 8.5                          | Final design load on rig elements.....   | 28        |
| <b>9</b>                     | <b>Structural components to be assessed — Simplified or developed method.....</b>                    | <b>29</b> |
| 9.1                          | General.....   | 29        |
| 9.2                          | Mast steps and mast pillars and their connection to the craft's structure.....                       | 29        |
| 9.3                          | Chainplates and their connections to the craft's structure.....                                      | 29        |
| 9.4                          | Design details of chainplates and their connection to the structure.....                             | 30        |
| 9.4.1                        | General.....   | 30        |
| 9.4.2                        | Strapped FRP chainplates.....  | 30        |
| <b>10</b>                    | <b>Application of the simplified method.....</b>   | <b>31</b> |
| <b>11</b>                    | <b>Application of the developed method.....</b>  | <b>31</b> |
| 11.1                         | General.....   | 31        |
| 11.2                         | General guidance for assessment by 3-D numerical procedures.....                                     | 31        |
| 11.2.1                       | General.....   | 31        |
| 11.2.2                       | Material properties.....   | 32        |
| 11.2.3                       | Boundary assumptions.....  | 32        |
| 11.2.4                       | Load application.....  | 32        |
| 11.2.5                       | Model idealization.....  | 32        |
| 11.3                         | Assessment by 'strength of materials' based methods.....   | 32        |
