Foreword	viii
Introduction	ix
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General	2
4.1 Technical design.....	2
4.2 Basic recommendations for the surveys.....	2
4.2.1 Survey object.....	2
4.2.2 Auxiliary parameters.....	3
4.2.3 Recommendations for the sampling equipment.....	3
4.2.4 Auxiliary equipment on board ship.....	3
4.2.5 Sampling method and scope of application.....	3
4.3 Sampling.....	3
4.3.1 Sediment sampling.....	3
4.3.2 Trawl sampling.....	3
4.3.3 Water sampling.....	4
4.3.4 Records.....	4
4.4 Sample analysis.....	4
4.4.1 Sample treatment.....	4
4.4.2 Sample measurement.....	4
4.4.3 Sample treatment and storage.....	4
4.4.4 Sample identification and enumeration.....	4
4.4.5 Sample data analysis.....	4
4.5 Basic recommendations of data organization.....	5
4.5.1 Organization of data.....	5
4.5.2 Data archiving, acceptance and achievements appraisal.....	5
4.6 Survey results.....	5
4.6.1 Original records.....	5
4.6.2 Maps or drawings.....	5
4.6.3 Investigation report.....	5
4.7 Data archiving.....	6
4.8 Program and quality control.....	6
5 Survey of the sediment	6
5.1 Principle.....	6
5.2 General provisions.....	7
5.3 Collection and preservation of the samples.....	7
5.4 Measurement of environmental factors.....	7
5.5 Measurement of the age of the sediments.....	7
5.6 Measurement of the contents of heavy metals, organic pollutants and oils in the sediments.....	7
5.7 Measurement of the grain size of the sediments.....	7
5.8 Analysis of the mineral compositions in the sediments.....	8
5.9 Classification of the substrate type in offshore sediments.....	8
5.10 Classification of the deep-sea sediments.....	8
5.11 Survey of the biological components in the sediments.....	8
5.11.1 Summary of the methods.....	8
5.11.2 Technical recommendations.....	8
5.11.3 Collection and preservation of the samples.....	9
5.12 Organization of data.....	9
6 Survey of foraminifera	9
6.1 Principle.....	9

6.2	General provisions	9
6.3	Collection and preservation of the samples	9
6.3.1	Sampling and sample processing	9
6.3.2	Collection and preservation of the sedimentary tests	10
6.3.3	Collection and preservation of living foraminifera	10
6.4	Tools and reagents	10
6.5	Processing and analysis of the samples	10
6.5.1	Numbering and weighing the crystallizing dish or beaker	10
6.5.2	Drying and weighing the sediment sample	11
6.5.3	Sample soaking	11
6.5.4	Washing and drying	11
6.5.5	Suspension and concentration	11
6.5.6	Bottling and sealing	11
6.5.7	Specimen preparation and analysis	11
7	Survey of ostracoda	12
7.1	Principle	12
7.2	General provisions	12
7.3	Collection and preservation of the samples	12
7.3.1	Sampling and sample processing	12
7.3.2	Collection and preservation of dead ostracod tests	13
7.3.3	Collection and preservation of living ostracods	13
7.4	Tools and reagents	13
7.5	Processing and analysis of the samples	13
7.5.1	Numbering and weighing the crystallizing dish or beaker	13
7.5.2	Drying and weighing	13
7.5.3	Sample soaking	14
7.5.4	Washing and drying	14
7.5.5	Suspension and concentration	14
7.5.6	Bottling and sealing	14
7.5.7	Microscopic examination and enumeration	14
8	Survey of radiolaria	15
8.1	Principle	15
8.2	General provisions	15
8.3	Collection and preservation of the samples	15
8.3.1	Sample processing	15
8.3.2	Collection and conservation of deposited empty shells	16
8.4	Tools and reagents	16
8.5	Processing and analysis of the samples	16
8.5.1	Sample pretreatment	16
8.5.2	Preparation of microscope slide specimens	16
9	Survey of sedimentary diatom	17
9.1	Principle	17
9.2	General provisions	17
9.3	Collection and preservation of the samples	17
9.3.1	Sampling and treatment	17
9.3.2	Collection and preservation of sedimentary remains	18
9.4	Tools and reagents	18
9.5	Processing and analysis of the samples	18
9.5.1	Sample pretreatment	18
9.5.2	Preparation of microscope slide specimens	19
9.6	Organization of data	19
10	Survey of coccoliths	19
10.1	Principle	19
10.2	General provisions	19
10.3	Collection and preservation of the samples	20
10.4	Tools and reagents	20

10.5	Processing and analysis of the samples	20
10.5.1	Pre-preparation of the equipment and the samples	20
10.5.2	Method of preparing simple smear slides	21
10.5.3	Pre-concentration of coccolith samples	21
10.6	Organization of data	21
11	Survey of sporopollen	22
11.1	Principle	22
11.2	General provisions	22
11.3	Collection and preservation of the samples	23
11.4	Tools and reagents	23
11.5	Processing and analysis of the samples	23
11.5.1	Sample disaggregation	23
11.5.2	Alkali-soluble digestion	24
11.5.3	Sieving	24
11.5.4	Carbonate digestion	24
11.5.5	Silicate digestion	24
11.5.6	Ultrasonic cleaning and sieving	24
11.5.7	Acetolysis	25
11.5.8	Storage of processed sample	25
11.5.9	Mounting sporopollen specimens	25
11.5.10	
	Glycerine jelly preparation	25
11.5.11	
	Precautions	25
11.6	Organization of data	26
12	Survey of benthic viruses	26
12.1	Principle	26
12.2	General provisions	26
12.3	Collection and preservation of the samples	26
12.3.1	Samples for epifluorescence microscopy	26
12.3.2	Samples for flow cytometry	27
12.3.3	Samples for environmental measurements and molecular diversity of viruses	27
12.4	Tools and reagents	27
12.4.1	Equipment and reagents for epifluorescence microscopy	27
12.4.2	Equipment and reagents for flow cytometry	28
12.4.3	Equipment and tools for molecular diversity of viruses	28
12.5	Processing and analysis of samples	28
12.5.1	Enumeration of viruses by epifluorescence microscopy	28
12.5.2	Procedure for flow cytometry	30
12.5.3	Estimation of the molecular diversity of viruses	30
13	Survey of benthic microbes	32
13.1	Principle	32
13.2	General provisions	32
13.3	Collection and preservation of the samples	33
13.3.1	Sampling stations and sample collection	33
13.3.2	On-site sample process	33
13.3.3	Sample storage	33
13.4	Tools and reagents	34
13.4.1	Equipment	34
13.4.2	Reagents	34
13.5	Processing and analysis of the samples	36
13.5.1	Assessment of molecular diversities of benthic microbes	36
13.5.2	Benthic microbial abundance	41
14	Survey of benthic microalgae	44
14.1	Principle	44

14.2	General provisions	44
14.3	Collection and preservation of the samples	45
14.3.1	Sampling design	45
14.3.2	Sampling methods	45
14.3.3	Sample preservation and fixation	46
14.4	Tools and reagents	46
14.5	Processing and analysis of the samples	46
14.5.1	Sample processing	46
14.5.2	Sample analysis	48
14.5.3	Abundance and biomass calculation	48
14.5.4	Cyst culture and identification	50
14.5.5	Fluorescence determination of demagnesium chlorophyll and chlorophyll a	50
14.5.6	Algal toxins determination	51
15	Survey of benthic protozoa	51
15.1	Principle	51
15.2	General provisions	51
15.3	Collection and preservation of the samples	52
15.3.1	Sampling equipment	52
15.3.2	Sediment core collection	52
15.3.3	Sediment layers	52
15.3.4	Sample fixation and preservation	52
15.3.5	Collection and treatment of living protozoa	53
15.4	Tools and reagents	54
15.4.1	Equipment and reagents for silica sol centrifugation	54
15.4.2	Equipment and reagents of quantitative protargol staining	54
15.4.3	Equipment and reagents for molecular analysis	54
15.5	Processing and analysis of the samples	55
15.5.1	Silica sol density centrifugation	55
15.5.2	Quantitative protargol stain (QPS)	56
15.5.3	Estimation of molecular diversity	59
16	Survey of metazoan meiobenthos	64
16.1	Principle	64
16.2	General provisions	65
16.3	Collection and preservation of the samples	65
16.3.1	Sampling in intertidal zones and shallow waters	65
16.3.2	Deep-sea sampling	65
16.3.3	Sample slicing	66
16.3.4	Sample fixation and preservation	67
16.3.5	Labelling	67
16.3.6	Record	67
16.4	Tools and reagents	67
16.5	Processing and analysis of the samples	67
16.5.1	Quantification and taxa analysis	67
16.5.2	Molecular analysis of biodiversity	68
16.6	Organization of data	69
16.6.1	Precision	69
16.6.2	Abundance	69
16.6.3	Biomass	70
16.6.4	Complete the report	71
16.6.5	Plotting data	71
	Annex A (informative) Photographs of several groups of communities of interstitial biota	72
	Annex B (informative) Several stratified sampling devices for the survey of interstitial biota	74
	Annex C (informative) Tables for sample labelling and sampling record — Examples	76
	Annex D (informative) Tables of microscopy records — Examples	78
	Annex E (informative) Calculation of community parameters	83

Annex F (informative) Record sheet for sample treatment — Examples	86
Annex G (informative) Characteristics for the classification of coccoliths	87
Annex H (informative) Flow diagram for the enumeration of viruses by epifluorescence microscopy	88
Annex I (informative) Filter unit used in microbenthos survey	89
Annex J (informative) Technical flowcharts for the investigation of microbenthos	90
Annex K (informative) Solutions and reagents	93
Bibliography	99
