Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Reference methods	1
4.1 Reference method 1: Hydrolysis and back titration	1
4.1.1 Principle	1
4.1.2 Reagents	2
4.1.3 Apparatus	2
4.1.4 Procedure	3
4.1.5 Expression of results	3
4.1.6 Test report	4
4.2 Reference method 2: Saponification and potentiometric titration	4
4.2.1 Principle	4
4.2.2 Reagents	4
4.2.3 Apparatus	4
4.2.4 Procedure	5
4.2.5 Expression of results	6
4.2.6 Test report	6
4.3 Reference method 3: Measurement of oxygen	6
4.3.1 Principle	6
4.3.2 Apparatus	6
4.3.3 procedure	7
4.3.4 Sampling	11
4.3.5 Calibration	11
4.3.6 Calculation of vinyl acetate content	12
4.3.7 Test report	12
5 Examples of test methods	12
5.1 Method using infrared spectrometry	12
5.1.1 Principle	12
5.1.2 Apparatus and materials	12
5.1.3 Procedure	13
5.1.4 Expression of results	15
5.1.5 Test report	16
5.2 Acidimetric method	16
5.2.1 Principle	16
5.2.2 Reagents and materials	16
5.2.3 Apparatus	17
5.2.4 Procedure	17
5.2.5 Expression of results	18
5.2.6 Test report	18
5.3 Iodometric method	19
5.3.1 Principle	19
5.3.2 Reagents	19
5.3.3 Apparatus	19
5.3.4 Procedure	19
5.3.5 Expression of results	20
5.3.6 Test report	20
5.4 Thermogravimetry method	20
5.4.1 Principle	20
5.4.2 Apparatus	21
5.4.3 Test specimens	21
5.4.4 Calibration	21

5.4.5	Procedure	21
5.4.6	Test report	22
Bibliography		23

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 9, *Thermoplastic materials*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 249, *Plastics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 8985:1998), which has been technically revised.

The main changes compared to the previous edition are as follows:

- the normative references have been updated to the latest version;
- the mandatory terms and definitions clause has been added (see [Clause 3](#));
- a “thermogravimetry test method” has been added;
- infrared spectrometer has been modified to be Fourier infrared spectrometer;
- the example of infrared spectrum has been modified from transmission to absorbance;
- the example of calibration curve has been modified.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
