About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
4 Symbols and abbreviated terms.....	7
5 Use case scenarios	7
5.1 General.....	7
5.2 Use cases.....	7
6 Description of use case	9
6.1 Agricultural product tracing	9
6.1.1 Scope and objectives of use case.....	9
6.1.2 Narrative of use case.....	9
6.1.3 Actors: people, components, systems, integrated systems, applications and organizations	10
6.1.4 Issues: legal contracts, legal regulations, and constraints.....	11
6.1.5 Reference standards and/or standardization committees	11
6.1.6 Relation with other known use cases	11
6.1.7 General remarks.....	11
6.1.8 Data security, privacy and trustworthiness	11
6.1.9 Conformity aspects	11
6.1.10 User requirements and interactions with other actors.....	11
6.1.11 Drawing of use case	12
6.1.12 Data flow diagram of use case.....	12
6.1.13 Sequence diagram of use case.....	13
6.2 Financial services for fish farming.....	14
6.2.1 Scope and objectives of use case.....	14
6.2.2 Narrative of use case.....	15
6.2.3 Actors: people, components, systems, integrated systems, applications and organizations	15
6.2.4 Issues: legal contracts, legal regulations, and constraints.....	16
6.2.5 Reference standards and/or standardization committees	16
6.2.6 Relation with other known use cases	16
6.2.7 General remarks.....	16
6.2.8 Data security, privacy and trustworthiness	16
6.2.9 Conformity aspects	17
6.2.10 User requirements and interactions with other actors.....	17
6.2.11 Drawing of use case	17
6.2.12 Data flow diagram of use case.....	18
6.2.13 Sequence diagram of use case.....	19
6.3 Chattel mortgage services	21
6.3.1 Scope and objectives of use case.....	21
6.3.2 Narrative of use case.....	21
6.3.3 Actors: people, components, systems, integrated systems, applications and organizations	21
6.3.4 Issues: legal contracts, legal regulations, and constraints.....	22
6.3.5 Reference standards and/or standardization committees	22

6.3.6	Relation with other known use cases	22
6.3.7	General remarks	22
6.3.8	Data security, privacy and trustworthiness	22
6.3.9	Conformity aspects	23
6.3.10	User requirements and interactions with other actors	23
6.3.11	Drawing of use case	23
6.3.12	Data flow diagram of use case	24
6.3.13	Sequence diagram(s) of use case	25
6.4	Distributed energy trading	26
6.4.1	Scope and objectives of use case	26
6.4.2	Narrative of use case	26
6.4.3	Actors: people, components, systems, integrated systems, applications and organizations	27
6.4.4	Issues: legal contracts, legal regulations, and constraints	28
6.4.5	Reference standards and/or standardization committees	28
6.4.6	Relation with other known use cases	28
6.4.7	General remarks	28
6.4.8	Data security, privacy and trustworthiness	28
6.4.9	Conformity aspects	29
6.4.10	User requirements and interactions with other actors	29
6.4.11	Drawing of use case	29
6.4.12	Data flow diagram of use case	30
6.4.13	Sequence diagram(s) of use case	31
6.5	Automated parking payment service	33
6.5.1	Scope and objectives of use case	33
6.5.2	Narrative of use case	33
6.5.3	Actors: people, components, systems, integrated systems, applications and organizations	33
6.5.4	Issues: legal contracts, legal regulations, and constraints	34
6.5.5	Reference standards and/or standardization committees	34
6.5.6	Relation with other known use cases	34
6.5.7	General remarks	34
6.5.8	Data security, privacy and trustworthiness	34
6.5.9	Conformity aspects	35
6.5.10	User requirements and interactions with other actors	35
6.5.11	Drawing of use case	35
6.5.12	Data flow diagram of use case	36
6.5.13	Sequence diagram(s) of use case	37
	Bibliography	39
	Figure 1 – General overview of smart agriculture	12

INTERNET OF THINGS (IoT) – INTEGRATION OF IoT AND DLT/BLOCKCHAIN: USE CASES

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO National bodies.
- 3) IEC and ISO documents have the form of recommendations for international use and are accepted by IEC and ISO National bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC and ISO documents is accurate, IEC and ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC and ISO National bodies undertake to apply IEC and ISO documents transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC and ISO document and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and ISO do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC and ISO marks of conformity. IEC and ISO are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this document.
- 7) No liability shall attach to IEC and ISO or their directors, employees, servants or agents including individual experts and members of its technical committees and IEC and ISO National bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this ISO/IEC document or any other IEC and ISO documents.
- 8) Attention is drawn to the Normative references cited in this document. Use of the referenced publications is indispensable for the correct application of this document.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC document may be the subject of patent rights. IEC and ISO shall not be held responsible for identifying any or all such patent rights.

IEC TR 30176 has been prepared by subcommittee 41: Internet of Things and Digital Twin, of ISO/IEC joint technical committee 1: Information technology. It is a Technical Report.

The text of this Technical Report is based on the following documents:

Draft	Report on voting
JTC1-SC41/220A/DTR	JTC1-SC41/241A/RVDTR

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this Technical Report is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1, available at www.iec.ch/members_experts/refdocs and www.iso.org/directives.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
