Foreword.....	v
Introduction.....	vi
<b>1 Scope.....</b>	<b>1</b>
<b>2 Normative references.....</b>	<b>1</b>
<b>3 Terms and definitions.....</b>	<b>1</b>
<b>4 Abbreviated terms.....</b>	<b>2</b>
<b>5 Basic principles.....</b>	<b>2</b>
5.1 Sustainability.....	2
5.2 Programme and circulation.....	2
5.3 Structure, mechanical and electrical systems.....	3
5.4 Products and components.....	3
5.5 Information technology.....	3
5.6 Safety.....	3
<b>6 Site selection and planning.....</b>	<b>3</b>
6.1 Site selection.....	3
6.2 Building layout.....	3
6.3 Circulation.....	3
6.4 Entrances.....	3
6.5 Preventing cross-contamination.....	4
6.6 Medical staff living area.....	4
<b>7 Architecture and structure system.....</b>	<b>4</b>
7.1 General provisions.....	4
7.1.1 Zoning.....	4
7.1.2 Accessibility.....	4
7.1.3 Construction method.....	4
7.1.4 Vertical circulation.....	4
7.1.5 Interior fittings and surfaces.....	4
7.1.6 Structural reliability.....	4
7.1.7 Structural system.....	5
7.1.8 Leak-proof.....	5
7.1.9 Light-weight structure.....	5
7.2 Specific requirements for respiratory infectious disease facilities.....	5
7.2.1 Zoning.....	5
7.2.2 Preventing cross-contamination.....	5
7.2.3 Building layout and airflow management.....	5
7.2.4 Negative pressure ward.....	5
7.2.5 Medical waste.....	5
7.2.6 Sealing.....	6
<b>8 Water supply and drainage system.....</b>	<b>6</b>
8.1 General provisions.....	6
8.1.1 Safety.....	6
8.1.2 Water supply.....	6
8.1.3 Water processing.....	6
8.1.4 Valves for maintenance.....	6
8.1.5 Hands-free faucets.....	6
8.1.6 Plumbing fixtures.....	6
8.1.7 Trap seal.....	6
8.1.8 Wastewater treatment.....	7
8.2 Specific requirements for respiratory infectious disease facilities.....	7
8.2.1 Sealing.....	7
8.2.2 Water supply pump station.....	7

	8.2.3	Water tank	7
	8.2.4	Water supply system	7
	8.2.5	Drainage system	7
	8.2.6	Vent stack	8
	8.2.7	Outdoor sewage system	8
	8.2.8	Sewage treatment	8
<b>9</b>		<b>Heating, ventilation and air conditioning system</b>	<b>8</b>
	9.1	General provisions	8
	9.1.1	Heating and air conditioning	8
	9.1.2	Natural ventilation	8
	9.2	Specific requirements for respiratory infectious disease facilities	8
	9.2.1	Mechanical ventilation	8
	9.2.2	Air filter	8
	9.2.3	Air supply and exhaust outlets	8
	9.2.4	Pressure monitor	9
	9.2.5	Exhaust fans	9
	9.2.6	Exhaust discharge	9
	9.2.7	Fresh air	9
	9.2.8	Negative pressure operating room	9
	9.2.9	Condensate	9
	9.2.10	Intensive care unit	9
<b>10</b>		<b>Electrical and intelligent systems</b>	<b>10</b>
	10.1	General provisions	10
	10.1.1	Power supply	10
	10.1.2	Lighting	10
	10.1.3	Equipotential bonding	10
	10.1.4	Lightning protection	10
	10.1.5	Intelligent building systems	10
	10.1.6	Equipment selection	10
	10.2	Specific requirements for respiratory infectious disease facilities	10
	10.2.1	Emergency power supply	10
	10.2.2	Sealing	10
	10.2.3	Disinfection and sterilization	11
	10.2.4	Telemedicine	11
	10.2.5	Video monitoring	11
	10.2.6	Access control	11
<b>11</b>		<b>Medical gas system</b>	<b>11</b>
	11.1	General provisions	11
	11.1.1	Principle of configuration	11
	11.1.2	Medical gas source	11
	11.1.3	Medical gas station	11
	11.1.4	Pipeline and accessories	11
	11.1.5	Terminal units	11
	11.1.6	Monitor and alarm system	12
	11.2	Specific requirements for respiratory infectious disease facilities	12
	11.2.1	Medical vacuum system	12
	11.2.2	Medical air and oxygen systems	12
	11.2.3	Other medical gas systems	12
	11.2.4	Calculating oxygen consumption	12
	11.2.5	Standby power supply	12
	11.2.6	Flow capacity	12
	11.2.7	Radiographic pipeline inspection	12
	11.2.8	Pipeline testing	12
	11.2.9	Uninterrupted supply	12

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

International Workshop Agreement IWA 38 was approved at a series of workshops hosted by the Standardization Administration of China (SAC), in association with China IPPR International Engineering Co., Ltd., held in Beijing, China, between January and April, 2021.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
