Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Determination of physical and chemical properties	2
4.1 Sampling.....	2
4.2 Test methods.....	2
4.3 Limit of acceptance.....	2
5 Test methods for purity	3
5.1 Method to determine purity by reduction with MBT and titration.....	3
5.1.1 Purpose.....	3
5.1.2 Principle.....	3
5.1.3 Reagents.....	3
5.1.4 Apparatus.....	4
5.1.5 Procedure.....	4
5.1.6 Expression of results (methods A and B).....	5
5.2 Method to determine purity by high performance liquid chromatography (HPLC).....	6
5.2.1 Purpose.....	6
5.2.2 Principle.....	7
5.2.3 Significance and use.....	7
5.2.4 Interferences.....	7
5.2.5 Reagents and materials.....	7
5.2.6 Apparatus.....	7
5.2.7 Calibration and standardization.....	8
5.2.8 Procedure.....	8
5.2.9 Sample analysis.....	9
5.2.10 Expression of results.....	9
5.3 Precision.....	10
6 Test method for insoluble material	10
6.1 Purpose.....	10
6.2 Principle.....	10
6.3 Significance and use.....	10
6.4 Reagents.....	11
6.5 Apparatus.....	11
6.6 Procedure.....	12
6.7 Expression of results.....	12
7 Test methods for melting range	12
7.1 Melting range by capillary tube.....	12
7.1.1 Purpose.....	12
7.1.2 Significance and use.....	12
7.1.3 Limitations.....	13
7.1.4 Apparatus.....	13
7.1.5 Preparation of test sample.....	13
7.1.6 Procedure.....	13
7.2 Melting range by differential scanning calorimetry (DSC).....	14
7.2.1 Purpose.....	14
7.2.2 Significance and use.....	14
7.2.3 Limitations.....	14
7.2.4 Apparatus.....	14
7.2.5 Preparation of test sample.....	14
7.2.6 Procedure.....	14
8 Test method for volatile material	15

8.1	Purpose	15
8.2	Principle	15
8.3	Apparatus	15
8.4	Procedure	16
8.5	Expression of results	16
9	Test method for wet sieve analysis	16
9.1	Purpose	16
9.2	Significance and use	16
9.3	Materials	17
9.3.1	Liquid detergent, neutral	17
9.4	Apparatus	17
9.5	Procedure	17
9.6	Expression of results	17
10	Test method for the determination of ash	18
10.1	Purpose	18
10.2	Principle	18
10.3	Significance and use	18
10.4	Apparatus	18
10.5	Procedure	19
10.6	Expression of results	19
11	Test report	19
Annex A	(informative) Classification and key properties of sulfenamide (class 1) vulcanization accelerators	21
Annex B	(informative) Precision	24
Bibliography	26

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

This third edition cancels and replaces the second edition (ISO 11235:2016), which has been technically revised.

The main changes are as follows:

- errors in [Formula \(1\)](#) and [Formula \(2\)](#) have been corrected;
- the CAS Registry Number^{®1)} has been added for each chemical;
- the usage of auto titrator with electrode has been added in [Clause 5](#);
- [Annex A](#) has been changed from “normative” to “informative”.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

1) CAS Registry Number[®] is a trademark of CAS corporation. This information is given for the convenience of users of this document and does not constitute an endorsement by ISO of the product named. Equivalent products may be used if they can be shown to lead to the same results.
