About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	7
2 Normative references	7
3 Terms and definitions	7
4 Abbreviated terms	8
5 u-MIB overview and basic concepts	8
5.1 u-MIB definition.....	8
5.2 Necessity of u-MIB in U-NMS.....	9
5.3 U-NMS system architecture for using u-MIB.....	9
5.4 Structure of u-MIB.....	10
5.4.1 General	10
5.4.2 u-MIB objects	10
5.4.3 u-MIB OIDs.....	10
5.4.4 u-MIB OID hierarchy	10
5.5 General format of managed objects in u-MIB	11
6 General requirements for constructing u-MIB in U-NMS	12
7 Designing the managed objects of manager and agent u-MIB.....	14
7.1 Object identifiers of u-MIB.....	14
7.2 Classification of u-MIB tables.....	15
7.3 Classification of MOs in the manager and agent u-MIB	15
7.4 MOs of u-MIB Trap	22
8 Integrating MOs of the manager and agent u-MIB.....	23
Annex A (informative) u-MIB Module	25
A.1 Example of creating u-MIB objects	25
A.2 Example of accessing MOs between manager and agent.....	28
Bibliography.....	31
Figure 1 – Elements of u-MIB in U-NMS.....	8
Figure 2 – U-NMS system architecture for using u-MIB	10
Figure 3 – u-MIB hierarchy structure	11
Figure 4 – General format of u-MIB.....	12
Figure 5 – MOs of the manager and agent u-MIB	16
Figure 6 – Structure of <i>event_trap</i>	22
Figure 7 – Integration of MOs between manager and agent u-MIB	23
Figure 8 – MOs' requests via the network management protocol.....	24
Figure A.1 – Device battery information requests via u-MIB in U-NMS	29
Figure A.2 – Example of MO value access from u_MIB	30
Table 1 – u-MIB object groups	11
Table 2 – Attributes used for representing MOs in u-MIB	12
Table 3 – Underwater network requirements of u-MIB in U-NMS	12
Table 4 – Mandatory underwater device requirements of u-MIB in U-NMS	13

Table 5 – Mandatory data type requirements of u-MIB in U-NMS	14
Table 6 – OIDs of u-MIB	14
Table 7 – Defining u-MIB tables	15
Table 8 – MOs of <i>u_networks</i>	17
Table 9 – MOs of <i>u_devices</i>	19
Table 10 – MOs of <i>u_trap</i> object in u-MIB	22

INTERNET OF THINGS (IoT) – UNDERWATER ACOUSTIC SENSOR NETWORK (UWASN) – NETWORK MANAGEMENT SYSTEM –

Part 2: Underwater management information base (u-MIB)

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO National bodies.
- 3) IEC and ISO documents have the form of recommendations for international use and are accepted by IEC and ISO National bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC and ISO documents is accurate, IEC and ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC and ISO National bodies undertake to apply IEC and ISO documents transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC and ISO document and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and ISO do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC and ISO marks of conformity. IEC and ISO are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this document.
- 7) No liability shall attach to IEC and ISO or their directors, employees, servants or agents including individual experts and members of its technical committees and IEC and ISO National bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this ISO/IEC document or any other IEC and ISO documents.
- 8) Attention is drawn to the Normative references cited in this document. Use of the referenced publications is indispensable for the correct application of this document.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC document may be the subject of patent rights. IEC and ISO shall not be held responsible for identifying any or all such patent rights.
- 10) The managed objects need to highlight specifically throughout this document. Therefore, the managed objects in this document are highlighted with italic font style.

ISO/IEC 30142-2 has been prepared by subcommittee 41: Internet of Things and Digital Twin, of ISO/IEC joint technical committee 1: Information technology. It is an International Standard.

The text of this International Standard is based on the following documents:

Draft	Report on voting
JTC1-SC41/288/FDIS	JTC1-SC41/296/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1, available at www.iec.ch/members_experts/refdocs and www.iso.org/directives.

In order to highlight specifically the managed objects in this document, the managed objects are written in italics throughout this document.

A list of all parts in the ISO/IEC 30142 series, published under the general title *Internet of Things (IoT) – Underwater acoustic sensor network (UWASN) – Network management system*, can be found on the IEC website.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
