|------------------------------------------------------------------------------------------|-----------|
| Foreword.....                                                                            | iv        |
| Introduction.....                                                                        | v         |
| <b>1 Scope.....</b>                                                                      | <b>1</b>  |
| <b>2 Normative references.....</b>                                                       | <b>1</b>  |
| <b>3 Terms, definitions, and symbols.....</b>                                            | <b>1</b>  |
| <b>4 Principle.....</b>                                                                  | <b>2</b>  |
| <b>5 Variables.....</b>                                                                  | <b>2</b>  |
| 5.1 Reference system.....                                                                | 2         |
| 5.2 Variables to be measured.....                                                        | 2         |
| <b>6 Measuring equipment.....</b>                                                        | <b>3</b>  |
| 6.1 Description.....                                                                     | 3         |
| 6.2 Transducer installations.....                                                        | 3         |
| 6.3 Data processing.....                                                                 | 3         |
| <b>7 Test conditions.....</b>                                                            | <b>3</b>  |
| 7.1 General.....                                                                         | 3         |
| 7.2 Test track.....                                                                      | 3         |
| 7.3 Wind velocity.....                                                                   | 4         |
| 7.4 Test vehicle.....                                                                    | 4         |
| 7.4.1 General data.....                                                                  | 4         |
| 7.4.2 Tyres.....                                                                         | 4         |
| 7.4.3 Operating components.....                                                          | 4         |
| 7.4.4 Loading conditions of vehicle.....                                                 | 4         |
| <b>8 Procedure.....</b>                                                                  | <b>5</b>  |
| 8.1 Warm-up.....                                                                         | 5         |
| 8.2 Initial driving condition.....                                                       | 5         |
| 8.3 Weave test procedure.....                                                            | 5         |
| <b>9 Data evaluation and presentation of results.....</b>                                | <b>6</b>  |
| 9.1 General.....                                                                         | 6         |
| 9.2 Time histories.....                                                                  | 6         |
| 9.3 Characteristic values.....                                                           | 6         |
| 9.3.1 General.....                                                                       | 6         |
| 9.3.2 Steering-wheel torque versus steering-wheel angle ( $M_H$ versus $\delta_H$ )..... | 8         |
| 9.3.3 Yaw velocity versus steering-wheel angle ( $d\psi/dt$ versus $\delta_H$ ).....     | 8         |
| 9.3.4 Yaw velocity versus steering-wheel torque ( $d\psi/dt$ versus $M_H$ ).....         | 8         |
| 9.3.5 Lateral acceleration versus steering-wheel angle ( $a_Y$ versus $\delta_H$ ).....  | 8         |
| 9.3.6 Steering-wheel torque versus lateral acceleration ( $M_H$ versus $a_Y$ ).....      | 8         |
| <b>Bibliography.....</b>                                                                 | <b>10</b> |
