Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Requirements	3
4.1 General requirement	3
4.1.1 Appearance and installation	3
4.1.2 Material	3
4.1.3 Cable	3
4.1.4 Battery	3
4.2 Technical specification of meteorological parameter measurement	3
4.3 Safety	4
4.4 Environmental conditions	4
4.5 Enclosure protection	4
4.6 Electromagnetic compatibility	4
4.7 Sampling, algorithm and meteorological data quality control	4
4.7.1 Sampling rate	4
4.7.2 Algorithm and data quality control	5
4.8 Data storage and transmission	5
4.8.1 Data storage	5
4.8.2 Data transmission	5
4.8.3 Communication interface	5
4.8.4 Transmission format	5
4.9 Display	5
4.10 Clock	6
4.10.1 Time error	6
4.10.2 Synchronized time	6
4.11 Power supply	6
5 Test methods	6
5.1 Test ambient conditions	6
5.2 Test standard apparatus	6
5.3 General requirements check	6
5.3.1 Appearance and installation	6
5.3.2 Material	7
5.3.3 Cable	7
5.3.4 Battery	7
5.4 Safety	7
5.5 Environmental conditions	7
5.6 Technical performance of meteorological parameters	7
5.6.1 Atmospheric pressure	7
5.6.2 Air temperature	7
5.6.3 Relative humidity	7
5.6.4 Relative wind direction	7
5.6.5 Apparent wind speed	7
5.6.6 True wind speed and true wind direction	7
5.6.7 Visibility	8
5.6.8 Sea-surface temperature	8
5.7 Data storage and transmission	8
5.7.1 Data storage and integrity	8
5.7.2 Data transmission	9
5.8 Clock	9
5.9 Power supply	9

6	True wind calculation	9
6.1	Principle	9
6.2	Components of the apparent wind ($S_{wa,X}$ and $S_{wa,Y}$)	9
6.3	Components of the ship's motion ($S_{m,X}$ and $S_{m,Y}$)	10
6.4	Components of the true wind ($S_{wt,X}$ and $S_{wt,Y}$)	10
6.5	Calculation of the true wind direction and true wind speed (D_{wt} and S_{wt})	10
Annex A	(informative) Installation requirements	13
Annex B	(informative) Requirements of ship motion information	14
Annex C	(normative) Observation data and metadata of SMIs	15
Bibliography		17

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 8, *Ships and marine technology*, Subcommittee SC 13, *Marine technology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
