National Foreword

This European Standard EN ISO 11929-4:2023 was adopted as Luxembourgish Standard ILNAS-EN ISO 11929-4:2023.

Every interested party, which is member of an organization based in Luxembourg, can participate for FREE in the development of Luxembourgish (ILNAS), European (CEN, CENELEC) and International (ISO, IEC) standards:

- Participate in the design of standards
- Foresee future developments
- Participate in technical committee meetings

English Version

Determination of the characteristic limits (decision threshold, detection limit and limits of the coverage interval) for measurements of ionizing radiation - Fundamentals and application - Part 4: Guidelines to applications (ISO 11929-4:2022)

Détermination des limites caractéristiques (seuil de décision, limite de détection et limites de l'intervalle élargi) pour le mesurage des rayonnements ionisants - Principes fondamentaux et applications - Partie 4: Lignes directrices relatives aux applications (ISO 11929-4:2022)

This European Standard was approved by CEN on 16 July 2023.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and United Kingdom.

European foreword

The text of ISO 11929-4:2022 has been prepared by Technical Committee ISO/TC 85 "Nuclear energy, nuclear technologies, and radiological protection" of the International Organization for Standardization (ISO) and has been taken over as EN ISO 11929-4:2023 by Technical Committee CEN/TC 430 "Nuclear energy, nuclear technologies, and radiological protection" the secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by January 2024, and conflicting national standards shall be withdrawn at the latest by January 2024.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

Any feedback and questions on this document should be directed to the users' national standards body. A complete listing of these bodies can be found on the CEN website.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Republic of North Macedonia, Romania, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Türkiye and the United Kingdom.

Endorsement notice

The text of ISO 11929-4:2022 has been approved by CEN as EN ISO 11929-4:2023 without any modification.

Foreword	vii
Introduction	viii
1 Scope	1
2 Normative references	2
3 Terms and definitions	2
4 Quantities and symbols	3
5 Summary of this document	5
5.1 Procedures according to ISO 11929 (all parts)	5
5.2 Survey on the examples	5
5.3 General stipulations	8
6 Counting measurements with small or moderate uncertainties	9
6.1 Definition of the task and general aspects	9
6.2 Model of evaluation and standard uncertainty	9
6.3 Available information, input data, and specifications	9
6.4 Evaluation of the measurement and characteristic limits according to ISO 11929-1	10
6.4.1 Background effect	10
6.4.2 Primary result and its associated standard uncertainty	10
6.4.3 Standard uncertainty as a function of an assumed true value	10
6.4.4 Decision threshold	10
6.4.5 Detection limit	11
6.4.6 Limits of coverage intervals	11
6.4.7 The best estimate and its associated standard uncertainty	11
6.5 Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	11
6.6 Assessment and explanations	13
7 Counting measurement with small count numbers	14
7.1 Definition of the task and general aspects	14
7.2 Model of evaluation and standard uncertainty	14
7.3 Available information, input data, and specifications	14
7.4 Evaluation of the measurement and characteristic limits according to ISO 11929-1	15
7.4.1 Background effect	15
7.4.2 Primary result and its associated standard uncertainty	15
7.4.3 Standard uncertainty as a function of an assumed true value	16
7.4.4 Decision threshold	16
7.4.5 Detection limit	16
7.4.6 Limits of coverage intervals	17
7.4.7 The best estimate and its associated standard uncertainty	17
7.5 Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	17
7.6 Assessment and explanations	18
7.7 An alternative example of a measurement with small count numbers	19
7.7.1 General	19
7.7.2 Background effect	20
7.7.3 Primary result and its associated standard uncertainty	20
7.7.4 Standard uncertainty as a function of an assumed true value	20
7.7.5 Decision threshold	20
7.7.6 Detection limit	21
7.7.7 Limits of coverage intervals	21
7.7.8 The best estimate and its associated standard uncertainty	21
7.8 Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	22
7.9 Assessment of the alternative example and explanations	23
8 Counting measurements with large uncertainties in the numerator of the calibration factor	23

8.1	Definition of the task and general aspects	23
8.2	Model of evaluation and standard uncertainty	24
8.3	Available information, input data, and specifications	24
8.4	Evaluation of the measurement and characteristic limits according to ISO 11929-1	25
8.4.1	Background effect	25
8.4.2	Primary result and its associated standard uncertainty	25
8.4.3	Standard uncertainty as a function of an assumed true value	25
8.4.4	Decision threshold	25
8.4.5	Detection limit	26
8.4.6	Limits of coverage intervals	26
8.4.7	The best estimate and its associated standard uncertainty	26
8.5	Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	26
8.6	Assessment and explanations	28
9	Counting measurements with large uncertainties in the denominator of the calibration factor	28
9.1	Definition of the task and general aspects	28
9.2	Model of evaluation and standard uncertainty	29
9.3	Available information, input data, and specifications	29
9.4	Evaluation of the measurement and characteristic limits according to ISO 11929-1	30
9.4.1	Background effect	30
9.4.2	Primary result and its associated standard uncertainty	30
9.4.3	Standard uncertainty as a function of an assumed true value	31
9.4.4	Decision threshold	31
9.4.5	Detection limit	31
9.4.6	Limits of coverage intervals	31
9.4.7	The best estimate and its associated standard uncertainty	32
9.5	Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	32
9.6	Assessment and explanations	33
10	Counting measurements with shielding of the background	34
10.1	Definition of the task and general aspects	34
10.2	Model of evaluation and standard uncertainty	34
10.3	Available information, input data, and specifications	34
10.4	Evaluation of the measurement and characteristic limits according to ISO 11929-1	35
10.4.1	Background effect	35
10.4.2	Primary result and its associated standard uncertainty	35
10.4.3	Standard uncertainty as a function of an assumed true value	35
10.4.4	Decision threshold	35
10.4.5	Detection limit	36
10.4.6	Limits of coverage intervals	36
10.4.7	The best estimate and its associated standard uncertainty	36
10.5	Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	36
10.6	Assessment and explanations	38
11	Counting clearance measurement	38
11.1	Definition of the task and general aspects	38
11.2	Model of evaluation and standard uncertainty	39
11.3	Available information, input data, and specifications	39
11.4	Evaluation of the measurement and characteristic limits according to ISO 11929-1	40
11.4.1	Background effect	40
11.4.2	Primary result and its associated standard uncertainty	40
11.4.3	Standard uncertainty as a function of an assumed true value	40
11.4.4	Decision threshold	41
11.4.5	Detection limit	41
11.4.6	Limits of coverage intervals	41
11.4.7	The best estimate and its associated standard uncertainty	42
11.5	Documentation of the results obtained by ISO 11929-1 and ISO 11929-2	42
11.6	Assessment and explanations	43
