## **Water quality — Determination of fluoride —**

### **Part 1:**

Electrochemical probe method for potable and  
lightly polluted water

*Qualité de l'eau — Dosage des fluorures —*

*Partie 1: Méthode de la sonde électrochimique pour l'eau potable et  
faiblement polluée*

Reference number  
ISO 10359-1:1992(E)

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 10359-1 was prepared by Technical Committee ISO/TC 147, *Water quality*, Sub-Committee SC 2, *Physical, chemical, biochemical methods*.

ISO 10359 consists of the following parts, under the general title *Water quality — Determination of fluoride*:

- *Part 1: Electrochemical probe method for potable and lightly polluted water*
- *Part 2: Determination of inorganically bound total fluoride after digestion and distillation*

Annex A of this part of ISO 10359 is for information only.
