## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO member bodies). The work of developing International Standards is carried out through ISO technical committees. Every member body interested in a subject for which a technical committee has been set up has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the technical committees are circulated to the member bodies for approval before their acceptance as International Standards by the ISO Council.

International Standard ISO 105/P was developed by Technical Committee ISO/TC 38, *Textiles*.

It was submitted directly to the ISO Council, in accordance with sub-clause 5.10.1 of part 1 of the Directives for the technical work of ISO.

This part of ISO 105 cancels and replaces group P of ISO 105-1978, originally published as parts 2 and 5 of ISO Recommendation R 105/IV-1968.

NOTE — International Standard ISO 105 is presented in the form of parts. Each of these parts corresponds to a group and is split up into its different component sections. This form facilitates the replacement of existing sections by successive editions as necessary.

## Contents of ISO 105

- ISO 105/A Textiles — Tests for colour fastness —**  
**Part A : General principles**
- A01** General principles of testing
  - A02** Grey scale for assessing change in colour
  - A03** Grey scale for assessing staining
- ISO 105/B Textiles — Tests for colour fastness —**  
**Part B : Colour fastness to light and weathering**
- B01** Colour fastness to light : Daylight
  - B02** Colour fastness to light : Xenon arc
  - B03** Colour fastness to weathering : Outdoor exposure
  - B04** Colour fastness to weathering : Xenon arc
  - B05** Detection and assessment of photochromism
- ISO 105/C Textiles — Tests for colour fastness —**  
**Part C : Colour fastness to washing and laundering**
- C01** Colour fastness to washing : Test 1
  - C02** Colour fastness to washing : Test 2
  - C03** Colour fastness to washing : Test 3
  - C04** Colour fastness to washing : Test 4
  - C05** Colour fastness to washing : Test 5
  - C06** Colour fastness to domestic and commercial laundering
- ISO 105/D Textiles — Tests for colour fastness —**  
**Part D : Colour fastness to dry cleaning**
- D01** Colour fastness to dry cleaning
  - D02** Colour fastness to rubbing : Organic solvents
- ISO 105/E Textiles — Tests for colour fastness —**  
**Part E : Colour fastness to aqueous agencies**
- E01** Colour fastness to water
  - E02** Colour fastness to sea water
  - E03** Colour fastness to chlorinated water (swimming-bath water)
  - E04** Colour fastness to perspiration
  - E05** Colour fastness to spotting : Acid
  - E06** Colour fastness to spotting : Alkali
  - E07** Colour fastness to spotting : Water
  - E08** Colour fastness to water : Hot water
  - E09** Colour fastness to potting
  - E10** Colour fastness to decatizing
  - E11** Colour fastness to steaming
  - E12** Colour fastness to milling : Alkaline milling
  - E13** Colour fastness to acid-felting : Severe
  - E14** Colour fastness to acid-felting : Mild
- ISO 105/F Textiles — Tests for colour fastness —**  
**Part F : Standard adjacent fabrics**
- F01** Specification for standard adjacent fabric : Wool
  - F02** Specification for standard adjacent fabric : Cotton and viscose
  - F03** Specification for standard adjacent fabric : Polyamide
  - F04** Specification for standard adjacent fabric : Polyester
  - F05** Specification for standard adjacent fabric : Acrylic
  - F06** Specification for standard adjacent fabric : Silk
- ISO 105/G Textiles — Tests for colour fastness —**  
**Part G : Colour fastness to atmospheric contaminants**
- G01** Colour fastness to nitrogen oxides
  - G02** Colour fastness to burnt gas fumes
  - G03** Colour fastness to ozone in the atmosphere
