Foreword	iv
Introduction.....	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	3
4.1 Symbols.....	3
4.2 Abbreviated terms	3
5 Protected regions	4
5.1 General	4
5.2 LEO protected region	4
5.3 GEO protected region	4
6 Technical requirements	5
6.1 Avoiding the intentional release of space debris into Earth orbit during normal operations.....	5
6.2 Avoiding break-ups in Earth orbit	5
6.3 Removing a spacecraft or launch vehicle orbital stage from the protected regions after end of mission	5
7 Space debris mitigation plan.....	7
Annex A (informative) Probability of successful disposal	8
Annex B (informative) Post-launch life cycle phases of a launch vehicle or spacecraft	11
Bibliography.....	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 24113 was prepared by Technical Committee ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 14, *Space systems and operations*.

This second edition cancels and replaces the first edition (ISO 24113:2010), of which it constitutes a minor revision.
