INTERNATIONAL STANDARD

Second edition 1995-08-15

Plastics — Ethylene/vinyl acetate (E/VAC) moulding and extrusion materials —

Part 2: Preparation of test specimens and determination of properties

Plastiques — Éthylène/acétate de vinyle (E/VAC) pour moulage et extrusion —

Partie 2: Préparation des éprouvettes et détermination des propriétés

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (EC) on all matters of electrotechnical standardization.

r

Praft International Standards adopted by the technical committees are girculated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting vote.

nternational Standard ISO 4613-2 was prepared by Technical Committee SO/TC 61, *Plastics*, Subcommittee SC 9, *Thermoplastic materials*.

his second edition cancels and replaces the first edition

text has been brought into accordance with the frame text developed by SC 9. The table of test methods has been revised in accordance with SO 10350.

BO 4613 consists of the following parts, under the general title plastics — Ethylene/vinyl acetate (E/VAC) moulding and extrusion materials:

- Part 1: Designation and specification
- Part 2: Preparation of test specimens and determination of properties
