About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente. un corrigendum ou amendement peut avoir été publié.

Liens utiles:

Recherche de publications CEI - www.iec.ch/searchpub

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Specifications	7
3.1 General	7
3.2 Dimensional requirements	7
3.3 Mechanical requirements.....	8
3.4 Transmission requirements.....	8
3.5 Environmental requirements	9
Annex A (normative) Specifications for sub-category A3a multimode fibres.....	10
Annex B (normative) Specifications for sub-category A3b multimode fibres.....	12
Annex C (normative) Specifications for sub-category A3c multimode fibres.....	14
Annex D (normative) Specifications for sub-category A3d multimode fibres	16
Annex E (normative) Specifications for sub-category A3e multimode fibres.....	18
Bibliography.....	20
Table 1 – Relevant dimensional attributes and measurement methods.....	7
Table 2 – Dimensional requirements common to all category A3 fibres	7
Table 3 – Additional dimensional attributes required for each sub-category	8
Table 4 – Relevant mechanical attributes and test methods	8
Table 5 – Mechanical requirements to be specified for each sub-category	8
Table 6 – Relevant transmission attributes and measurement methods.....	8
Table 7 – Additional transmission attributes required for each sub-category	9
Table 8 – Relevant environmental attributes and test methods.....	9
Table A.1 – Dimensional requirements specific to A3a fibres	10
Table A.2 – Mechanical requirements specific to A3a fibres	10
Table A.3 – Transmission requirements specific to A3a fibres.....	11
Table B.1 – Dimensional requirements specific to A3b fibres	12
Table B.2– Mechanical requirements specific to A3b fibres.....	12
Table B.3 –Transmission requirements specific to A3b fibres	12
Table C.1 – Dimensional requirements specific to A3c fibres	14
Table C.2 – Mechanical requirements specific to A3c fibres.....	14
Table C.3 –Transmission requirements specific to A3c fibres.....	14
Table C.4 – Environmental exposure tests	15
Table C.5 – Attributes measured.....	15
Table D.1 – Dimensional requirements specific to A3d fibres	16
Table D.2 – Mechanical requirements specific to A3d fibres.....	16
Table D.3 – Transmission requirements specific to A3d fibres.....	16
Table D.4 – Environmental exposure tests	17
Table D.5 – Attributes measured.....	17
Table E.1 – Dimensional requirements specific to A3e fibres	18

Table E.2 – Mechanical requirements specific to A3e fibres	18

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL FIBRES –

**Part 2-30: Product specifications –
Sectional specification for category A3 multimode fibres**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60793-2-30 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This third edition cancels and replaces the second edition, published in 2007. It constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- addition of a new sub-category A3e;
- changed unit for core-cladding concentricity error and proof stress level.
