About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

More than 60 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references.....	6
3 Specifications.....	7
3.1 General.....	7
3.2 Dimensional requirements.....	7
3.3 Mechanical requirements.....	8
3.4 Transmission requirements.....	8
3.5 Environmental requirements.....	9
Annex A (normative) Specifications for sub-category A2a multimode fibres.....	10
A.1 General.....	10
A.2 Dimensional requirements.....	10
A.3 Mechanical requirements.....	10
A.4 Transmission requirements.....	10
A.5 Environmental requirements.....	11
Annex B (normative) Specifications for sub-category A2b multimode fibres.....	12
B.1 General.....	12
B.2 Dimensional requirements.....	12
B.3 Mechanical requirements.....	12
B.4 Transmission requirements.....	12
B.5 Environmental requirements.....	13
Annex C (normative) Specifications for sub-category A2c multimode fibres.....	14
C.1 General.....	14
C.2 Dimensional requirements.....	14
C.3 Mechanical requirements.....	14
C.4 Transmission requirements.....	14
C.5 Environmental requirements.....	15
Bibliography.....	16
Table 1 – Relevant dimensional attributes and measurement methods.....	7
Table 2 – Dimensional requirements common to all category A2 fibres.....	7
Table 3 – Additional dimensional attributes required for each sub-category.....	8
Table 4 – Relevant mechanical attributes and test methods.....	8
Table 5 – Mechanical requirements common to all category A2 fibres.....	8
Table 6 – Relevant transmission attributes and measurement methods.....	8
Table 7 – Requirements common to all category A2 fibres.....	9
Table 8 – Relevant environmental attributes and test methods.....	9
Table A.1 – Dimensional requirements specific to A2a fibres.....	10
Table A.2 – Mechanical requirements specific to A2a fibres.....	10
Table A.3 – Transmission requirements specific to A2a fibres.....	11
Table A.4 – Environmental exposure tests.....	11
Table A.5 – Attributes measured.....	11

Table B.1 – Dimensional requirements specific to A2b fibres	12
Table B.2 – Mechanical requirements specific to A2b fibres	12
Table B.3 – Transmission requirements specific to A2b fibres	12
Table B.4 – Environmental exposure tests	13
Table B.5 – Attributes measured	13
Table C.1 – Dimensional requirements specific to A2c fibres	14
Table C.2 – Mechanical requirements specific to A2c fibres	14
Table C.3 – Transmission requirements specific to A2c fibres	14
Table C.4 – Environmental exposure tests.....	15
Table C.5 – Attributes measured	15

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL FIBRES –

**Part 2-20: Product specifications –
Sectional specification for category A2 multimode fibres**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60793-2-20 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This third edition cancels and replaces the second edition, published in 2007. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Na_{th} has been replaced by NA_{ff} ;
- b) specified test specimen length and measurement details for core diameter and NA_{ff} measurements.
