About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

CONTENTS

FOREWORD.....	4
0 INTRODUCTION	6
0.1 Rationale for the digital factory reference model.....	6
0.2 Approach to the digital factory	6
1 Scope.....	9
2 Normative references	9
3 Terms, definitions, symbols and abbreviated terms.....	9
3.1 Terms and definitions	9
3.2 Symbols and abbreviated terms.....	11
3.2.1 General symbols and abbreviated terms	11
3.2.2 Symbols and abbreviated terms used by the reference model.....	11
3.3 Conventions	12
3.3.1 Representation of basic elements	12
3.3.2 Representation of relationships	12
3.3.3 Representation of views	13
4 Overview of the digital factory model and repository	13
5 Reference model concepts	15
5.1 Properties	15
5.1.1 General	15
5.1.2 Property attributes	16
5.2 Basic elements.....	16
5.3 Relationships between basic elements (BE relationships).....	18
5.3.1 General	18
5.3.2 Relationship type attribute	19
5.3.3 Duration attribute.....	21
5.3.4 Timing attribute	22
5.3.5 Operation attribute.....	23
5.3.6 Valid combinations of relationship attributes	24
6 Activities of the reference model.....	26
6.1 Relationship between the digital factory repository and activities.....	26
6.2 Filtering of data for lifecycle viewpoints	27
6.3 Activities for lifecycle workflow	27
6.3.1 General concepts for automation activities	27
6.3.2 Example of lifecycle activities – simulation activity.....	28
Annex A (informative) Relationships between terms.....	30
Annex B (informative) Reference to property database standards	33
Bibliography.....	35
Figure 1 – The digital factory and related standard activities.....	8
Figure 2 – Transition from legacy systems to new electronic approach	14
Figure 3 – Overview of the DF repository, automation assets and activities	15
Figure 4 – Example of properties of an automation asset.....	16
Figure 5 – Viewpoints on properties of an automation asset.....	17

Figure 6 – Grouping of properties for an automation asset	18
Figure 7 – Relationships between basic elements	18
Figure 8 – Example view of the structural relationships for a single PLC	20
Figure 9 – Example view of operational relationships of distributed functions	21
Figure 10 – Examples of structural relationship types (permanent and temporary)	21
Figure 11 – Examples of operational relationship types (permanent and temporary)	22
Figure 12 – Example of relationships with timing attributes	23
Figure 13 – Examples of relationships	25
Figure 14 – Part of an engineering activity	26
Figure 15 – Filtering of data for lifecycle activities	27
Figure 16 – Lifecycle workflow	28
Figure 17 – Production process vs. application performance requirements	29
Figure 18 – Performance simulation of a digital factory	29
Figure A.1 – Relationships between terms (1)	31
Figure A.2 – Relationships between terms (2)	32
Figure B.1 – Overview of the IEC 61987 series	33
Figure B.2 – Overview of the IEC 62683 standard	34
Table 1 – Conventions for representation of basic elements	12
Table 2 – Conventions for representation of structural relationships optional attribute	12
Table 3 – Conventions for representation of operational relationships optional attributes	13
Table 4 – Summary of valid combinations of relationship attributes	24

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**INDUSTRIAL-PROCESS MEASUREMENT,
CONTROL AND AUTOMATION –**

**Reference model for representation of production facilities
(digital factory)**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC 62794, which is a technical report, has been prepared by IEC technical committee 65: Industrial-process measurement, control and automation.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
65/499/DTR	65/508/RVC

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

IMPORTANT – The 'colour inside' logo on the cover page of this publication indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
