### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

## CONTENTS

FOREWORD.....	7
INTRODUCTION.....	9
1 Scope.....	12
2 Normative references.....	12
3 Terms, definitions and abbreviated terms.....	13
3.1 Preamble.....	13
3.2 General definitions.....	13
3.3 Specific definitions.....	17
3.3.1 Common definitions.....	17
3.3.2 Definitions for Annex A.....	17
3.3.3 Definitions for Annex B.....	18
3.3.4 Definitions for Annex C.....	19
3.3.5 Definitions for Annex D.....	20
3.4 Abbreviated terms.....	22
3.4.1 Common abbreviations.....	22
3.4.2 Abbreviations for Annex A.....	22
3.4.3 Abbreviations for Annex B.....	22
3.4.4 Abbreviations for Annex C.....	22
3.4.5 Abbreviations for Annex D.....	22
3.5 Conventions.....	23
4 General architecture.....	23
4.1 Generic PDS interface.....	23
4.2 Typical structure of automation systems.....	27
4.3 Structure of the logical PDS.....	28
4.4 Use cases of the PDS.....	30
4.4.1 General.....	30
4.4.2 Use case engineering.....	31
4.4.3 Use case operation-control.....	31
5 Functional elements.....	32
5.1 Device identification FE.....	32
5.1.1 General.....	32
5.1.2 Parameters.....	32
5.2 Device Control FE.....	33
5.2.1 General.....	33
5.2.2 I/O data.....	33
5.2.3 States.....	34
5.2.4 Parameters.....	35
5.3 Communication FE.....	35
5.3.1 General.....	35
5.3.2 I/O data.....	36
5.3.3 States.....	36
5.3.4 Parameters.....	38
5.4 Basic drive FE.....	38
5.4.1 General.....	38
5.4.2 I/O data.....	39

5.4.3	States.....	40
5.4.4	Parameters.....	41
5.5	Optional application FE .....	42
6	Application modes .....	42
6.1	General.....	42
6.2	Torque control.....	43
6.3	Velocity control.....	44
6.4	Position control .....	45
7	Profile specific extensions .....	46
8	Structure for annexes .....	46
8.1	General.....	46
8.2	Structure of the annexes .....	47
Annex A (normative) Mapping to Profile CiA 402 drive and motion control .....		50
Annex B (normative) Mapping to profile CIP Motion™ .....		62
Annex C (normative) Mapping to profile PROFIdrive .....		74
Annex D (normative) Mapping to Profile SERCOS .....		87
Bibliography.....		100
Figure 1 – Structure of IEC 61800-7.....		11
Figure 2 – Definition of power drive system.....		23
Figure 3 – Example of system structures for position-control applications .....		24
Figure 4 – Examples of system structures for velocity-control applications.....		25
Figure 5 – Examples of system structures for torque-control applications .....		26
Figure 6 – Typical structure of automation systems (adapted from IEC/TR 62390).....		27
Figure 7 – Structure of the PDS with functional elements.....		29
Figure 8 – Functional Elements (FE) in the logical PDS .....		30
Figure 9 – Use case for the generic PDS interface.....		31
Figure 10 – The generic interface in the use case operation .....		32
Figure 11 – Device control FE state-chart diagram.....		34
Figure 12 – Device control FE state transition table .....		35
Figure 13 – Communication FE state-chart diagram.....		37
Figure 14 – Communication FE state transition table .....		37
Figure 15 – Optional communication FE state-chart diagram.....		38
Figure 16 – Optional communication FE state transition table .....		38
Figure 17 – Basic drive FE state-chart diagram.....		40
Figure 18 – Basic drive FE state transition table .....		40
Figure 19 – Optional basic drive FE state-chart diagram .....		41
Figure 20 – Optional basic drive FE state transition table .....		41
Figure 21 – Torque control application mode .....		43
Figure 22 – Torque control with velocity feedback application mode .....		43
Figure 23 – Velocity preset application mode.....		44
Figure 24 – Velocity control application mode .....		44

Figure 25 – Velocity control with position feedback application mode.....	45
Figure 26 – Position preset application mode.....	45
Figure 27 – Position control application mode.....	46
Figure A.1 – CiA 402 logical power drive system model.....	51
Figure B.1 – Object structure of the logical PDS.....	63
Figure B.2 – Object structure of the logical PDS.....	63
Figure B.3 – Motion Axis Object state machine.....	66
Figure C.1 – Overview of communication devices and services in PROFIdrive.....	75
Figure C.2 – Structure of the PROFIdrive device.....	76
Figure C.3 – PROFIdrive Axis type Drive Object.....	77
Figure C.4 – Functional block diagram of the PROFIdrive Axis type DC.....	78
Figure C.5 – Mapping of communication FE states.....	81
Figure D.1 – Topology example.....	88
Figure D.2 – State machine of Basic Drive FE.....	93
Table 1 – Structures within the scope of this part of IEC 61800-7.....	27
Table 2 – Parameters in the device identification FE.....	33
Table 3 – Status values for the device control FE.....	34
Table 4 – Command values for the device control FE.....	34
Table 5 – Parameters in the device control FE.....	35
Table 6 – Status values for the communication FE (see Figure 13).....	36
Table 7 – Command values for the communication FE (see Figure 13).....	36
Table 8 – Status values for the optional communication FE (see Figure 15).....	36
Table 9 – Command values for the optional communication FE (see Figure 15).....	36
Table 10 – Status values of the basic drive FE.....	39
Table 11 – Optional status values for the basic drive FE.....	39
Table 12 – Command values for basic drive FE.....	39
Table 13 – Optional command values for the basic drive FE.....	40
Table 14 – Possible generic application modes.....	42
Table 15 – Set-point values for generic application modes.....	42
Table 16 – Mapping of names to profiles.....	46
Table 17 – Structure of annexes.....	47
Table 18 – Profile specific terms.....	48
Table 19 – Supported application modes.....	48
Table 20 – I/O data for profile torque mode.....	48
Table 21 – I/O data for profile velocity mode.....	49
Table 22 – I/O data for profile position mode.....	49
Table A.1 – Profile specific terms.....	50
Table A.2 – Drive device identification parameters.....	52
Table A.3 – Status values for the device control FE.....	52
Table A.4 – Command values for the device control FE.....	52
Table A.5 – Parameters in the device control FE.....	53
Table A.6 – Status values for the communication FE.....	53

Table A.7 – Command values for the communication FE.....	53
Table A.8 – Status values for the basic drive FE.....	54
Table A.9 – Command values for the basic drive FE.....	54
Table A.10 – Basic drive FE parameters.....	55
Table A.11 – Optional application functions FE parameters.....	55
Table A.12 – Supported application modes.....	56
Table A.13 – I/O data for profile torque mode.....	56
Table A.14 – Parameter for profile torque mode.....	56
Table A.15 – I/O data for cyclic sync torque mode.....	57
Table A.16 – Parameter for cyclic sync torque mode.....	57
Table A.17 – I/O data for velocity mode.....	57
Table A.18 – Parameter for velocity mode.....	57
Table A.19 – I/O data for profile velocity mode.....	58
Table A.20 – Parameter for profile velocity mode.....	58
Table A.21 – I/O data for cyclic sync velocity mode.....	58
Table A.22 – Parameter for cyclic sync velocity mode.....	58
Table A.23 – I/O data for profile position mode.....	59
Table A.24 – Parameter for profile position mode.....	59
Table A.25 – I/O data for interpolated position mode.....	60
Table A.26 – Parameter for interpolated position mode.....	60
Table A.27 – I/O data for cyclic sync position mode.....	60
Table A.28 – Parameter for cyclic sync position mode.....	61
Table B.1 – Profile specific terms.....	62
Table B.2 – Mapping of parameters for the device identification FE.....	65
Table B.3 – Mapping of status values for the device control FE.....	65
Table B.4 – Mapping of command values for the device control FE.....	65
Table B.5 – Mapping of parameters for the device control FE.....	67
Table B.6 – Mapping of status values for the communication FE.....	67
Table B.7 – Mapping of command values for the communication FE.....	68
Table B.8 – Mapping of status values for the optional communication FE.....	68
Table B.9 – Mapping of command values for the optional communication FE.....	68
Table B.10 – Status values for the basic drive FE.....	69
Table B.11 – Command values for the basic drive FE.....	69
Table B.12 – Drive Control Mode values for the basic drive FE.....	69
Table B.13 – Command Data Set values for the basic drive FE.....	70
Table B.14 – Actual Data Set values for the basic drive FE.....	70
Table B.15 – Status Data Set values for the basic drive FE.....	71
Table B.16 – Supported application modes.....	72
Table B.17 – Set-point values for the generic application modes.....	72
Table B.18 – I/O data for profile torque mode.....	72
Table B.19 – I/O data for profile velocity mode.....	73
Table B.20 – I/O data for profile position mode.....	73
Table C.1 – Profile specific terms.....	74

Table C.2 – Parameters for device identification .....	79
Table C.3 – Status values for the device control FE .....	80
Table C.4 – Command values for the device control FE .....	80
Table C.5 – Device control parameters .....	80
Table C.6 – Status values of the basic drive FE .....	82
Table C.7 – Command values of the basic drive FE .....	82
Table C.8 – Status values for the optional basic drive FE .....	83
Table C.9 – Command values for the optional basic drive FE .....	83
Table C.10 – Device control parameters .....	83
Table C.11 – Supported application modes .....	84
Table C.12 – I/O data for profile velocity mode .....	85
Table C.13 – I/O data for profile velocity control mode with position feedback .....	85
Table C.14 – I/O data for profile velocity control mode (process technology) .....	86
Table C.15 – I/O data for profile position preset .....	86
Table C.16 – I/O data for profile position mode .....	86
Table D.1 – Profile specific terms .....	87
Table D.2 – Device identification parameters .....	90
Table D.3 – Status values for the device control FE .....	90
Table D.4 – Command values for the device control FE .....	91
Table D.5 – Parameters for the device control FE .....	91
Table D.6 – Status values for the basic drive and communication FE .....	93
Table D.7 – Command values for the basic drive and communication FE .....	94
Table D.8 – IDN for operation modes .....	94
Table D.9 – Supported application modes .....	95
Table D.10 – Additional application modes .....	96
Table D.11 – I/O data for profile torque mode .....	96
Table D.12 – Configuration data for torque control .....	96
Table D.13 – I/O data for profile velocity mode .....	97
Table D.14 – Configuration data for velocity control .....	97
Table D.15 – I/O data for profile position mode .....	98
Table D.16 – Configuration data for position control .....	98
