About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references.....	8
3 Terms and definitions.....	9
4 General requirements.....	10
4.1 Protection against flooding.....	10
4.2 Rotating machines.....	10
4.3 Conductors, equipment and apparatus.....	10
4.4 Main switchboards.....	10
4.5 Precautions against vibration and mechanical shock.....	11
4.6 Axes of rotation.....	11
5 Limits of inclination of the unit.....	11
5.1 Authority requirement.....	11
5.2 Machines, equipment and apparatus – General.....	11
5.3 Propulsion machinery.....	11
5.4 Emergency machinery.....	11
5.5 Dynamic condition.....	11
6 Bilge pumps.....	12
6.1 Power supply.....	12
6.2 Cables and cable connections.....	12
6.3 Location of starting arrangement.....	12
7 Navigation lights.....	12
7.1 General.....	12
7.2 Navigation lights when in operation.....	12
7.3 Steaming lights.....	12
7.4 Collision regulations.....	12
7.5 Power supply and monitoring systems.....	13
7.6 Special requirements for lights using LEDs.....	13
8 Steering gear.....	13
8.1 Power operated steering gear.....	13
8.2 Motors.....	14
8.3 Motor starters.....	14
8.4 Power circuits supply.....	14
8.5 Supply of control circuits and control systems.....	14
8.6 Circuit protection.....	15
8.7 Starting and stopping of motors for steering gear power units.....	15
8.8 Steering gear control systems.....	15
8.9 Alarms and indications.....	15
8.10 Rudder angle indication.....	16
8.11 Separation of circuits.....	16
8.12 Communication between navigating bridge and steering gear compartment.....	16
9 Electric propulsion.....	16
9.1 General.....	16
9.2 General requirements.....	17
9.2.1 Torque and critical speeds.....	17

9.2.2	Lubrication	18
9.2.3	Prime movers	18
9.3	Electromagnetic compatibility (EMC) and harmonic distortion	19
9.3.1	General	19
9.3.2	Total harmonic distortion, THD	19
9.3.3	Radio frequency interference	19
9.4	Harmonic filtering	19
9.5	Generators, motors, semiconductor convertors and electric slip-couplings	20
9.5.1	Machine and equipment temperature and ventilation	20
9.5.2	Accessibility and facilities for repair <i>in situ</i>	20
9.5.3	Protection against moisture and condensate	21
9.5.4	Sudden short circuits	21
9.5.5	Overspeed of propulsion motors	21
9.5.6	Exciter sets	21
9.5.7	Semiconductor convertor design data	21
9.6	Protection against moisture and condensation	22
9.7	Controlgear	22
9.7.1	Location of manoeuvring controls	22
9.7.2	Engine order systems	22
9.7.3	Operation of manoeuvring controls	22
9.7.4	Interlocking of the means of control	23
9.8	Cables and wiring	23
9.8.1	Conductors	23
9.8.2	Internal wiring	23
9.8.3	Bus-bars	23
9.9	Main and control circuits	23
9.9.1	Control	23
9.9.2	Power management system	24
9.9.3	Circuitry and components	26
9.10	Protection of the system	26
9.10.1	Protection	26
9.10.2	Instrumentation	27
9.11	Propulsion transformers	28
9.12	Testing	28
10	Dynamic positioning	28
11	Ballast systems	28
11.1	General	28
11.2	Ballast pumps	29
11.3	Control and indicating systems	29
11.4	Internal communication	30
11.5	Protection against flooding	30
12	Jacking systems	30
12.1	General	30
12.2	Design	30
12.3	Holding capacity	31
12.4	Electric motor capacity	31
12.5	Control and monitoring	31
12.6	Jacking gear motors and motor controller	31
12.6.1	General	31

12.6.2	Group installation	31
12.6.3	Overcurrent protection	32
12.6.4	Running protection	32
12.6.5	Metering	32
12.7	Testing onboard	32
13	Anchoring systems	32
13.1	General	32
13.2	Anchoring arrangements	32
13.3	Control systems	32
13.4	Thruster-assisted anchoring systems (TA).....	33
Annex A (informative)	Enhanced system verification test (HIL test).....	34
Bibliography.....		36
Figure 1	– Typical equipment (configuration) for unit with one or two propellers.....	17
Figure 2	– Typical control configuration	25

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MOBILE AND FIXED OFFSHORE UNITS –
ELECTRICAL INSTALLATIONS –****Part 5: Mobile units**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61892-5 has been prepared by IEC technical committee 18: Electrical installations of ships and of mobile and fixed offshore units.

This second edition cancels and replaces the first edition published in 2000. This edition constitutes a technical revision.

This second edition includes the following significant technical changes with respect to the previous edition:

- a) the requirement to d.c. generators has been deleted;
- b) the requirement to EMC has been rewritten;
- c) the requirement to power management system has been added;
- d) an informative annex regarding testing of DP systems has been added.
