About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC online collection - oc.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	10
2 Normative references	11
3 Terms and definitions	12
4 Technical information	13
4.1 System of levels.....	13
4.1.1 Performance levels	13
4.1.2 Compatibility levels, according to IEC 61076-1	13
4.2 Classification into climatic categories.....	13
4.3 Contact terminations	13
4.4 Available connector codings.....	13
4.5 Ratings	15
4.6 Marking.....	15
4.7 Safety aspects	15
5 Dimensional information	15
5.1 General.....	15
5.2 Survey of styles and variants	15
5.2.1 General	15
5.2.2 Fixed connectors	15
5.2.3 Free connectors.....	22
5.3 Interface dimension	31
5.3.1 General	31
5.3.2 Outer push-pull locking: male fixed connector side view	32
5.3.3 Outer push-pull locking: female fixed connector side view with details and engage-plane definition for male free cable connectors type 1 and 2	33
5.3.4 Inner push-pull locking: female fixed connector side view and male free connector side view with details for both.....	36
5.4 Gauges – Sizing gauges and retention force gauges	39
6 Characteristics	39
6.1 Classification into climatic category	39
6.2 Electrical characteristics	39
6.2.1 Voltage proof.....	39
6.2.2 Rated voltage – Rated impulse voltage – Pollution degree	39
6.2.3 Current-carrying capacity.....	40
6.2.4 Contact resistance	40
6.2.5 Insulation resistance.....	40
6.2.6 Transmission performance.....	40
6.3 Mechanical characteristics	40
6.3.1 Mating interface.....	40
6.3.2 Push-pull locking mechanism.....	41
6.4 Other characteristics	42
6.4.1 Vibration (sinusoidal)	42
6.4.2 Shock	42
6.4.3 Degree of protection provided by enclosures (IP code)	42
7 Test schedule	42
7.1 General.....	42

7.2	Test schedule	43
7.2.1	Test group P – Preliminary	43
7.2.2	Test group AP – Dynamic/climatic	43
7.2.3	Test group BP – Mechanical endurance	43
7.2.4	Test group CP – Electrical load	44
7.2.5	Test group DP – Chemical resistivity	44
7.2.6	Test group EP – Connection method tests	44
7.2.7	Test group FP – Electrical transmission requirements	44
Annex A	(informative) Diameter and position of the female connector body	45
A.1	Diameter of the female connector body	45
A.2	Position of female connector body for connectors with outer push-pull locking	45
A.3	Position of female connector body for connectors with inner push-pull locking	46
Annex B	(informative) Example for L-coded connector and comparison between screw- and inner push-pull-locking	48
Annex C	(informative) Styles of female free connectors to extend free male cable connectors	50
Figure 1	– Tube insert, male contacts, thread for M12 screw locking on tube	17
Figure 2	– Fixed connector, male contacts, with M12 screw locking and outer push-pull locking, square flange front mounting	17
Figure 3	– Fixed connector, male contacts, with M12 screw locking and outer push-pull locking, with wire ends, single hole front mounting thread M16 × 1,5	18

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61076-2-010 has been prepared by subcommittee 48B: Electrical connectors, of IEC technical committee 48: Electrical connectors and mechanical structures for electrical and electronic equipment.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
48B/2876/FDIS	48B/2887/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/standardsdev/publications.

A list of all parts in the IEC 61076 series, published under the general title *Connectors for electrical and electronic equipment – Product requirements*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

INTRODUCTION

The International Electrotechnical Commission (IEC) draws attention to the fact that it is claimed that compliance with this International Standard may involve the use of patent(s) concerning the free connectors

The IEC takes no position concerning the evidence, validity and scope of these patent rights.

The holder of this patent right has assured the IEC that he/she is willing to give free licences with applicants throughout the world. In this respect, the statement of the holder of this patent right is registered with the IEC.
