### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

## CONTENTS

FOREWORD .....	7
1 Scope .....	10
2 Normative references .....	10
3 Terms and definitions .....	12
4 Duty .....	17
4.1 Declaration of duty .....	17
4.2 Duty types .....	18
4.2.1 Duty type S1 – Continuous running duty .....	18
4.2.2 Duty type S2 – Short-time duty .....	19
4.2.3 Duty type S3 – Intermittent periodic duty .....	20
4.2.4 Duty type S4 – Intermittent periodic duty with starting .....	21
4.2.5 Duty type S5 – Intermittent periodic duty with electric braking .....	22
4.2.6 Duty type S6 – Continuous operation periodic duty .....	24
4.2.7 Duty type S7 – Continuous operation periodic duty with electric braking .....	25
4.2.8 Duty type S8 – Continuous operation periodic duty with related load/speed changes .....	26
4.2.9 Duty type S9 – Duty with non-periodic load and speed variations .....	27
4.2.10 Duty type S10 – Duty with discrete constant loads and speeds .....	28
5 Rating .....	31
5.1 Assignment of rating .....	31
5.2 Classes of rating .....	31
5.2.1 Rating for continuous running duty .....	31
5.2.2 Rating for short-time duty .....	31
5.2.3 Rating for periodic duty .....	31
5.2.4 Rating for non-periodic duty .....	31
5.2.5 Rating for duty with discrete constant loads and speeds .....	32
5.2.6 Rating for equivalent loading .....	32
5.3 Selection of a class of rating .....	32
5.4 Allocation of outputs to class of rating .....	32
5.5 Rated output .....	33
5.5.1 DC generators .....	33
5.5.2 AC generators .....	33
5.5.3 Motors .....	33
5.5.4 Synchronous compensators .....	33
5.6 Rated voltage .....	33
5.6.1 DC generators .....	33
5.6.2 AC generators .....	33
5.6.3 AC motors .....	33
5.7 Preferred combinations of voltages and outputs .....	33
5.8 Machines with more than one rating .....	34
6 Site conditions .....	34
6.1 General .....	34
6.2 Altitude .....	34
6.3 Maximum ambient air temperature .....	34
6.4 Minimum ambient air temperature .....	34
6.5 Water coolant temperature .....	35

6.6	Standstill, storage and transport .....	35
6.7	Purity of hydrogen coolant .....	35
7	Electrical operating conditions .....	35
7.1	Electrical supply.....	35
7.2	Form and symmetry of voltages and currents .....	36
7.2.1	AC motors .....	36
7.2.2	AC generators .....	37
7.2.3	Synchronous machines.....	37
7.2.4	DC motors supplied from static power converters .....	38
7.3	Voltage during starting of AC motors.....	39
7.4	Voltage and frequency variations during operation .....	39
7.5	Three-phase AC machines operating on unearthed systems .....	41
7.6	Voltage (peak and gradient) withstand levels .....	42
8	Thermal performance and tests .....	42
8.1	Thermal class .....	42
8.2	Reference coolant.....	42
8.3	Conditions for thermal tests .....	43
8.3.1	Electrical supply .....	43
8.3.2	Temperature of machine before test .....	43
8.3.3	Temperature of coolant.....	44
8.3.4	Measurement of coolant temperature during test .....	44
8.4	Temperature rise of a part of a machine.....	44
8.5	Methods of measurement of temperature .....	45
8.5.1	General .....	45
8.5.2	Resistance method .....	45
8.5.3	Embedded temperature detector (ETD) method .....	45
8.5.4	Thermometer method.....	45
8.6	Determination of winding temperature .....	45
8.6.1	Choice of method .....	45
8.6.2	Determination by resistance method .....	46
8.6.3	Determination by ETD method .....	48
8.6.4	Determination by thermometer method .....	48
8.7	Duration of thermal tests .....	48
8.7.1	Rating for continuous running duty .....	48
8.7.2	Rating for short-time duty .....	49
8.7.3	Rating for periodic duty.....	49
8.7.4	Ratings for non-periodic duty and for duty with discrete constant loads .....	49
8.8	Determination of the thermal equivalent time constant for machines of duty type S9.....	49
8.9	Measurement of bearing temperature.....	49
8.10	Limits of temperature and of temperature rise .....	50
8.10.1	General .....	50
8.10.2	Indirect cooled windings .....	50
8.10.3	Direct cooled windings.....	54
8.10.4	Adjustments to take account of hydrogen purity on test .....	55
8.10.5	Permanently short-circuited windings, magnetic cores and all structural components (other than bearings) whether or not in contact with insulation.....	55
8.10.6	Commutators and sliprings, open or enclosed and their brushes and brushgear .....	55

9	Other performance and tests .....	57
9.1	Routine tests .....	57
9.2	Withstand voltage test .....	58
9.3	Occasional excess current .....	62
9.3.1	General .....	62
9.3.2	Generators .....	62
9.3.3	Motors (except commutator motors and permanent magnet motors) .....	62
9.3.4	Commutator machines .....	62
9.4	Momentary excess torque for motors .....	62
9.4.1	Polyphase induction motors and DC motors .....	62
9.4.2	Polyphase synchronous motors .....	63
9.4.3	Other motors .....	63
9.5	Pull-up torque and locked-rotor torque for cage induction motors with direct online starting .....	63
9.6	Safe operating speed of cage induction motors .....	63
9.7	Overspeed .....	64
9.8	Short-circuit current for synchronous machines .....	65
9.9	Short-circuit withstand test for synchronous machines .....	65
9.10	Commutation test for commutator machines .....	66
9.11	Total harmonic distortion ( <i>THD</i> ) for synchronous machines .....	66
9.11.1	General .....	66
9.11.2	Limits .....	66
9.11.3	Tests .....	66
9.12	Protective earth test .....	66
9.13	Measurement of insulation resistance and polarization index of winding insulation .....	67
9.14	Shaft-voltage test .....	68
10	Information requirements .....	68
10.1	General .....	68
10.2	Product documentation .....	68
10.3	Rating plate .....	68
10.4	Information content .....	69
10.4.1	General .....	69
10.4.2	Minimum information requirements .....	69
10.4.3	All AC machines .....	70
10.4.4	All DC machines .....	70
10.4.5	Machines over 5 kW (or 5 kVA) rated output .....	70
10.4.6	Optional information .....	70
11	Miscellaneous requirements .....	71
11.1	Protective earthing of machines .....	71
11.2	Shaft-end key(s) .....	72
12	Tolerances .....	72
12.1	General .....	72
12.2	Tolerances on values of quantities .....	73
13	Electromagnetic compatibility (EMC) .....	74
13.1	General .....	74
13.2	Immunity .....	75
13.2.1	Machines not incorporating electronic circuits .....	75
13.2.2	Machines incorporating electronic circuits .....	75

13.3	Emission .....	75
13.4	Immunity tests .....	75
13.5	Emission measurements .....	75
14	Application requirements .....	75

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

## ROTATING ELECTRICAL MACHINES –

## Part 1: Rating and performance

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60034-1 has been prepared by IEC technical committee 2: Rotating machinery. It is an International Standard.

This fourteenth edition cancels and replaces the thirteenth edition published in 2017. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

Clause or subclause	Change
1	Clarification of the scope
2	General use of dated references
3.29	Clarification on identification of maximum and minimum current
3.34	Definition of main insulation
3.35	Definition of converter capable machine
3.36	Definition of converter duty machine
3.37	Definition of shaft voltage
4.2	Explanation for using duty types S9 and S10 for converter duty machines
5.6.3	New subclause for clarification of the terms range of rated voltages and voltage variations
6.2	Requirement to consider reduced arcing distance in machine design for altitudes >1 000 m
7.1	Clarification on bus transfer or fast reclosing Clarification on the capability to withstand impulse voltages
7.3	New subclause on voltage deviation during starting
7.4	Extended variation of supply frequency Note added on design for operation with extended voltage and frequency Recommended derating added for high variations of voltage and frequency
7.6	Clarification that enamelled wires are no bare living material
8.3.1	Clarification on electrical supply during thermal tests added
9.1	Changes in Table 16, especially inclusion of PM and reluctance synchronous machines
9.2	Requirement on test equipment for withstand voltage test added Test voltage for variable speed AC machines added Clarification to withstand voltage test for machines after stock holding
9.5	Extended to requirements on minimum locked rotor torque
9.10	Note added on criteria for commutation test
9.11.3	Clarification added that synchronous motors do not need a THD test
9.12	New subclause on protective earth test
9.13	New subclause on measurement of insulation resistance and polarization index
9.14	New subclause on shaft-voltage measurement
10.	Clause has been rearranged completely Clarification on unit symbol for speed added
11.1	Clarification on protective earth test after installation added
12.1	Clarification on the tolerances due to the accuracy of the test equipment Note on measurement uncertainty added
12.2	Change in the tolerance on efficiency Clarification on the tolerance on locked-rotor current New tolerance on sound pressure level
14	Improved title of clause

The text of this International Standard is based on the following documents:

Draft	Report on voting
2/2084/FDIS	2/2090/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/standardsdev/publications](http://www.iec.ch/standardsdev/publications).

A list of all parts of the IEC 60034 series, published under the general title *Rotating electrical machines*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**
