About the IEC
The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications
The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform
The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, …). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished
Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc
If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org
The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC
La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC
Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC - webstore.iec.ch/advsearchform
La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, …). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished
Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc
Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch
Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org
Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

FOREWORD 6
INTRODUCTION 8
1 Scope 9
2 Normative references 9
3 Terms and definitions 11
3.1 General terms and definitions 11
3.2 Assemblies of switchgear and controlgear 11
3.3 Parts of assemblies 12
3.4 Switching devices 13
3.5 Parts of switchgear and controlgear 13
3.6 Operational characteristics of switchgear and controlgear 13
3.7 Characteristic quantities 13
3.8 Index of definitions 13
4 Normal and special service conditions 13
4.1 Normal service conditions 13
4.2 Special service conditions 14
5 Ratings 15
5.1 General 15
5.2 Rated voltage 16
5.3 Rated insulation level 16
5.4 Rated frequency (f_r) 16
5.5 Rated continuous current (I_r) 16
5.6 Rated short-time withstand current (I_k) 17
5.7 Rated peak withstand current (I_p) 17
5.9 Rated supply voltage of auxiliary and control circuits (U_a) 18
5.10 Rated supply frequency of auxiliary and control circuits 18
5.11 Rated pressure of compressed gas supply for controlled pressure systems 18
5.101 Rated power and total losses of CEADS 19
5.102 Ratings of the internal arc classification (IAC) 19
6 Design and construction 20
6.1 Requirements for liquids in switchgear and controlgear 21
6.2 Requirements for gases in switchgear and controlgear 21
6.3 Earthing of switchgear and controlgear 21
6.4 Auxiliary and control equipment and circuits 22
6.5 Dependent power operation 22
6.6 Stored energy operation 22
6.7 Independent unlatched operation (independent manual or power operation) 22
6.8 Manually operated actuators 22
6.9 Operation of releases 22
6.10 Pressure/level indication 22
6.11 Nameplates 22
6.12 Locking devices 23
6.13 Position indication 23
6.14 Degrees of protection provided by enclosures 23
6.15 Creepage distances for outdoor insulators 24

6.16 Gas and vacuum tightness 24
6.17 Tightness for liquid systems 24
6.18 Fire hazard (flammability) 24
6.19 Electromagnetic compatibility (EMC) 24
6.20 X-ray emission 24
6.21 Corrosion 24
6.22 Filling levels for insulation, switching and/or operation 24
6.101 Protection against mechanical stresses 25
6.102 Protection of the environment due to internal defects 25
6.103 Internal arc fault 25
6.104 Enclosures 26
6.105 Sound emission 26
6.106 Electromagnetic fields 26
6.107 Solar radiation 26
7 Type tests 27
7.1 General 27
7.2 Dielectric tests 28
7.3 Radio interference voltage (RIV) test 32
7.4 Resistance measurement 32
7.5 Continuous current tests 32
7.6 Short-time withstand current and peak withstand current tests 32
7.7 Verification of the protection 33
7.8 Tightness tests 33
7.9 Electromagnetic compatibility tests (EMC) 33
7.10 Additional tests on auxiliary and control circuits 34
7.11 X-radiation test for vacuum interrupters 34
7.101 Temperature-rise tests 35
7.102 Internal arc test 42
7.103 Verification of making and breaking capacities of high-voltage functional unit 45
7.104 Mechanical operation tests 45
7.105 Mechanical stability test 45
7.106 Pressure withstand test for gas-filled compartments 45
7.107 Measurements of leakage currents of non-metallic enclosures 46
7.108 Weatherproofing test 46
7.109 Tightness and mechanical strength for liquid filled compartments 46
7.110 Measurement or calculation of electromagnetic fields 46
8 Routine tests 46
8.1 General 46
8.2 Dielectric tests on the main circuit 47
8.3 Tests on auxiliary and control circuits 48
8.4 Measurement of the resistance of the main circuit 48
8.5 Tightness test 48
8.6 Design and visual checks 48
8.101 Mechanical operation tests on high-voltage functional unit 48
8.102 Pressure tests of gas-filled compartments 48
8.103 Tests of auxiliary electrical, pneumatic and hydraulic devices 49
8.104 Measurement of the winding resistance 49
8.105 Measurement of the voltage ratio and check of phase displacement 49
8.106 Measurement of the short circuit impedance and load losses 49

8.107 Measurement of no-load loss and current 49
8.108 Inspection of the low-voltage functional unit, including inspection of wiring, operational performance and function 49
8.109 Checking of protective measures and of the electrical continuity of the protective circuits of the low-voltage functional unit 49
8.110 Tests after CEADS assembly on site 49
9 Guide to the selection of CEADS (informative) 49
9.1 General 49
9.2 Selection of rated values 50
9.3 Cable-interface considerations 50
9.4 Continuous or temporary overload due to changed service conditions 50
9.5 Environmental aspects 50
9.101 Selection of internal arc classification 50
9.102 Summary of technical requirements and ratings for CEADS 52
10 Information to be given with enquiries, tenders and orders (informative) 56
10.1 General 56
10.2 Information with enquiries and orders 56
10.3 Information with tenders 57
11 Transport, storage, installation, operating instructions and maintenance 58
11.1 General 58
11.2 Conditions during transport, storage and installation 58
11.3 Installation 58
11.4 Operating instructions 59
11.5 Maintenance 60
11.101 Dismantling, recycling and disposal at the end of service life 60
12 Safety 60
12.1 General 60
12.101 Electrical aspects 61
12.102 Mechanical aspects 61
12.103 Thermal aspects 61
12.104 Internal arc aspects 61
13 Influence of the product on the environment 61
Annex A (normative) Method for testing CEADS under conditions of arcing due to an internal arc fault 62
A.1 General 62
A.2 Room simulation 62
A.3 Indicators (for assessing the thermal effects of the gases) 62
A.4 Tolerances for geometrical dimensions of test arrangements 64
A.5 Test parameters 64
A.6 Test procedure 64
A.7 Designation of the internal arc classification 66
Annex B (normative) Test to verify the sound level of a CEADS 75
B.1 Purpose 75
B.2 Test object 75
B.3 Test method 75
B.4 Measurements 75
B.5 Presentation and calculation of the results 75
Annex C (informative) Types and application of CEADS 76

C.1 Type of CEADS 76
C.2 Application of CEADS 76

INTERNATIONAL ELECTROTECHNICAL COMMISSION

_____

HIGH-VOLTAGE SWITCHGEAR AND CONTROLGEAR –

Part 212: Compact Equipment Assembly for Distribution Substation (CEADS) for AC voltages up to 52 kV

FOREWORD

1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
6) All users should ensure that they have the latest edition of this publication.
7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 62271-212 has been prepared by subcommittee 17C: Assemblies, of IEC technical committee 17: High-voltage switchgear and controlgear. It is an International Standard.

This second edition cancels and replaces the first edition published in 2016. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

a) clause numbering aligned with IEC 62271-1:2017,
b) rewording of title and scope of the document,
c) implement changes on internal arc definition and testing following the evolution of prefabricated substation concept according to IEC 62271-202,
d) general review of main test procedures such as temperature rise or dielectric test on interconnections, considering control equipment, communication, smart grid devices and integration of components,

e) general review of installation, operation, safety and maintenance requirements.

The text of this International Standard is based on the following documents:

Draft	Report on voting
17C/845/FDIS	17C/850/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/standardsdev/publications.

This International Standard should be read in conjunction with IEC 62271-1:2017, to which it refers and which is applicable unless otherwise specified. In order to simplify the indication of corresponding requirements, the same numbering of clauses and subclauses is used as in IEC 62271-1:2017. Amendments to these clauses and subclauses are given under the same numbering, whilst additional subclauses, are numbered from 101.

A list of all parts of the IEC 62271 series can be found, under the general title *High-voltage switchgear and controlgear*, on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.

INTRODUCTION

Traditionally a high-voltage/low-voltage distribution substation has been constructed by installing the main electrical components –high-voltage switchgear and controlgear, power transformer and the corresponding low-voltage switchgear and controlgear- within a closed electrical operating area. It can be a room within a building intended for other usages (non electrical uses) or a separated housing (prefabricated or not) designed specifically to contain the electrical equipment of the substation or an open area limited by fences.

Some years ago in the search for a more standardized and compact substation, the concept of prefabricated substation was developed. IEC 62271-202 covers this type of substation. According to this document, the main electrical components (high-voltage switchgear and controlgear, power transformer and low-voltage switchgear and controlgear) are fully in compliance with their respective product standard, and the whole substation, including interconnections and enclosure is designed and type tested and later manufactured and routine tested in the factory. Correspondingly the quality of the substation is assured by the manufacturer.

Moreover, also other types of assemblies have been introduced in the market. These are assemblies comprising the main electrical active components of the substation and their interconnections, delivered as a single product. The product can therefore be type tested, manufactured, routine tested in the factory, transported and then installed in a closed electrical operating area.

This type of factory assembled and type-tested product is covered by this document receiving the generic name CEADS from Compact Equipment Assembly for Distribution Substation. Numerous arrangements are possible and this document provides guidance on basic types of assemblies, which might be envisaged.

A CEADS is not covered by IEC 61936-1. However, CEADS is intended to become part of a distribution substation.

Taking into account the closer proximity of the main electrical components that even can share some parts (enclosure, solid or fluid insulation…), it is very relevant to take notice of the potential interaction between them. Therefore, to cover CEADS is neither sufficient nor always applicable to refer to the relevant product standards. This document covers any additional design and construction requirements and test methods applicable to the different types of CEADS. In addition to the specified characteristics, particular attention has been paid to the specification concerning the protection of persons, both operators and general public.

The CEADS is also of interest to committee TC 14: Power transformers, and committee TC 121: Switchgear and controlgear and their assemblies for low voltage.
