### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

#### IEC publications search - [webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

#### IEC Customer Service Centre - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

### A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

### A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

#### Recherche de publications IEC -

[webstore.iec.ch/advsearchform](http://webstore.iec.ch/advsearchform)

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

#### IEC Just Published - [webstore.iec.ch/justpublished](http://webstore.iec.ch/justpublished)

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

#### Service Clients - [webstore.iec.ch/csc](http://webstore.iec.ch/csc)

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: [sales@iec.ch](mailto:sales@iec.ch).

#### IEC Products & Services Portal - [products.iec.ch](http://products.iec.ch)

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

#### Electropedia - [www.electropedia.org](http://www.electropedia.org)

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 300 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 19 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

FOREWORD .....	4
1 Scope .....	6
2 Normative references .....	6
3 Terms and definitions .....	6
4 General principles of AC measurements .....	7
4.1 General.....	7
4.2 Principle of the single sheet tester method.....	7
4.3 Test apparatus.....	7
4.3.1 Yokes .....	7
4.3.2 Windings .....	9
4.4 Air flux compensation.....	10
4.5 Test specimen .....	10
4.6 Power supply .....	11
5 Determination of the specific total loss .....	11
5.1 Principle of measurement.....	11
5.2 Apparatus .....	11
5.2.1 Voltage measurement.....	11
5.2.2 Frequency measurement .....	12
5.2.3 Power measurement.....	12
5.3 Measurement procedure of the specific total loss .....	12
5.3.1 Preparation of measurement.....	12
5.3.2 Adjustment of power supply .....	12
5.3.3 Measurements .....	13
5.3.4 Reproducibility of the measurement of the specific total loss .....	14
6 Determination of magnetic field strength, primary current and specific apparent power .....	14
6.1 General.....	14
6.2 Principle of measurement.....	14
6.2.1 Peak value of the magnetic polarization.....	14
6.2.2 RMS value of the primary current.....	14
6.2.3 Peak value of the magnetic field strength .....	15
6.3 Apparatus .....	15
6.3.1 Average type voltmeter .....	15
6.3.2 RMS current measurement .....	16
6.3.3 Peak current measurement.....	16
6.3.4 Power supply.....	16
6.3.5 Resistor R .....	16
6.4 Measuring procedure .....	16
6.4.1 Preparation for measurement .....	16
6.4.2 Measurement.....	16
6.4.3 Non-oriented material .....	17
6.5 Determination of characteristics.....	17
6.5.1 Determination of $\hat{J}$ .....	17
6.5.2 Determination of $\tilde{H}$ .....	17
6.5.3 Determination of $\hat{H}$ .....	18

6.5.4	Determination of $S_S$ .....	18
6.5.5	Reproducibility of the measurement of the specific apparent power .....	19
7	Test report.....	19
Annex A (normative) Requirements concerning the manufacture of yokes.....		20
Annex B (informative) Check and verification of reliable performance of the SST set-up by the use of reference samples and impact of the loss dissipated in the yokes .....		22
Annex C (informative) Epstein to SST relationship for grain-oriented steel sheet .....		25
Annex D (informative) Digital sampling methods for the determination of the magnetic properties and numerical air flux compensation .....		28
D.1	General.....	28
D.2	Technical details and requirements .....	28
D.3	Calibration aspects .....	30
D.4	Numerical air flux compensation .....	30
Bibliography.....		32
Figure 1 – Schematic diagrammes of the test apparatus .....		8
Figure 2 – Yoke dimensions .....		9
Figure 3 – Diagram of the connections of the five coils of the primary winding .....		9
Figure 4 – Circuit for the determination of the specific total loss.....		10
Figure 5 – Circuit for measuring the RMS value of the primary current.....		15
Figure 6 – Circuit for measuring the peak value of the magnetic field strength .....		15
Figure B.1 – Specific total loss vs. peak flux density (after J.Sievert [3] and G. Bertotti [4]); straight line: $P_S \propto B^{1.85}$ approximation (after C.Ragusa). .....		23
Figure C.1 – SST-Epstein relative difference $\delta P$ for conventional grain-oriented material versus magnetic polarization $\hat{J}$ .....		27
Figure C.2 – SST-Epstein relative difference $\delta HS$ for conventional grain-oriented material versus magnetic polarization $\hat{J}$ .....		27
Table B.1 – Loss dissipated by the yokes of a standard SST, determined from the loss curves measured on 3 yoke pairs as shown in Figure B.1, and relevant quantities including the relative yokes' contribution, $p_Y$ ; exemplified using 5 standard grades.....		24
Table C.1 – SST-Epstein relative differences $\delta P$ and $\delta HS$ and the conversion factor $F_C$ for conventional grain-oriented material in the polarization range 1,0 T to 1,8 T .....		26

## INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MAGNETIC MATERIALS –****Part 3: Methods of measurement of the magnetic properties of electrical steel strip and sheet by means of a single sheet tester**

## FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 60404-3 has been prepared by IEC technical committee 68: Magnetic alloys and steels. It is an International Standard.

This third edition cancels and replaces the second edition published in 1992, Amendment 1:2002 and Amendment 2:2009. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) Annex A was revised. The method of determining the yokes' lamination resistance was added to Annex A;
- b) Annex B of the consolidated version of 2010 referred to calibration of the SST using the Epstein method. It was cancelled;
- c) Annex B (new), Annex C and Annex D were revised, they are for information only;
- d) Annex C was modified taking account of the new situation regarding P and R grades;
- e) Annex D was amended by addition of Clause D.4 on the numerical air flux compensation.

The text of this International Standard is based on the following documents:

Draft	Report on voting
68/699/CDV	68/710/RVC

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at [www.iec.ch/members\\_experts/refdocs](http://www.iec.ch/members_experts/refdocs). The main document types developed by IEC are described in greater detail at [www.iec.ch/publications](http://www.iec.ch/publications).

A list of all parts in the IEC 60404 series, published under the general title *Magnetic materials*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under [webstore.iec.ch](http://webstore.iec.ch) in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

**IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.**
