### About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

### About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: [www.iec.ch/searchpub](http://www.iec.ch/searchpub)

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: [www.iec.ch/online\\_news/justpub](http://www.iec.ch/online_news/justpub)

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: [www.electropedia.org](http://www.electropedia.org)

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

## CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references.....	6
3 Terms and definitions .....	6
4 Installation considerations.....	7
4.1 Installation conditions .....	7
4.2 Climatic conditions.....	7
5 Materials and cable construction .....	7
5.1 General remarks.....	7
5.2 Cable construction.....	7
5.2.1 Conductor.....	7
5.2.2 Insulation.....	7
5.2.3 Cable element .....	7
5.2.4 Cable make-up .....	8
5.2.5 Screening of cable core .....	8
5.2.6 Sheath.....	8
5.2.7 Identification .....	8
5.2.8 Finished cable .....	8
6 Characteristics and requirements.....	8
6.1 General remarks.....	8
6.2 Electrical characteristics .....	9
6.2.1 Conductor resistance.....	9
6.2.2 Resistance unbalance.....	9
6.2.3 Dielectric strength.....	9
6.2.4 Insulation resistance.....	9
6.2.5 Mutual capacitance .....	9
6.2.6 Capacitance unbalance.....	9
6.2.7 Transfer impedance.....	9
6.2.8 Coupling attenuation .....	10
6.2.9 Current-carrying capacity .....	10
6.2.10 Shield resistance .....	10
6.3 Transmission characteristics.....	10
6.3.1 Velocity of propagation (phase velocity) .....	10
6.3.2 Phase delay and differential delay (delay skew).....	10
6.3.3 Attenuation .....	11
6.3.4 Unbalance attenuation .....	11
6.3.5 Near-end crosstalk ( <i>NEXT</i> ).....	11
6.3.6 Far-end crosstalk ( <i>FEXT</i> ) .....	12
6.3.7 Alien (exogenous) near-end crosstalk .....	12
6.3.8 Alien (exogenous) far-end crosstalk .....	12
6.3.9 Alien (exogenous) crosstalk of bundled cables .....	12
6.3.10 Impedance.....	12
6.3.11 Return loss ( <i>RL</i> ).....	12
6.4 Mechanical and dimensional characteristics and requirements .....	13
6.4.1 Dimensional requirements.....	13
6.4.2 Elongation at break of the conductors .....	13

6.4.3	Tensile strength of the insulation.....	13
6.4.4	Elongation at break of the insulation.....	13
6.4.5	Adhesion of the insulation to the conductor .....	13
6.4.6	Elongation at break of the sheath .....	13
6.4.7	Tensile strength of the sheath .....	13
6.4.8	Crush test of the cable .....	13
6.4.9	Impact test of the cable.....	13
6.4.10	Bending under tension .....	13
6.4.11	Repeated bending of the cable.....	13
6.4.12	Tensile performance of the cable .....	13
6.4.13	Shock test of the cable.....	14
6.4.14	Bump test of the cable .....	14
6.4.15	Vibration test of a cable .....	14
6.5	Environmental characteristics .....	14
6.5.1	Shrinkage of insulation.....	14
6.5.2	Wrapping test of insulation after thermal ageing.....	14
6.5.3	Bending test of insulation at low temperature .....	14
6.5.4	Elongation at break of the sheath after ageing.....	14
6.5.5	Tensile strength of the sheath after ageing.....	14
6.5.6	Sheath pressure test at high temperature .....	14
6.5.7	Cold bend test of the cable .....	14
6.5.8	Heat shock test.....	14
6.5.9	Damp heat steady state .....	14
6.5.10	Solar radiation .....	15
6.5.11	Solvents and contaminating fluids.....	15
6.5.12	Salt mist and sulphur dioxide .....	15
6.5.13	Water immersion .....	15
6.5.14	Hygroscopicity .....	15
6.5.15	Wicking .....	15
6.5.16	Flame propagation characteristics of a single cable.....	15
6.5.17	Flame propagation characteristics of bunched cables.....	15
6.5.18	Halogen gas evolution.....	15
6.5.19	Smoke generation.....	15
6.5.20	Toxic gas emission .....	15
6.5.21	Integrated fire test .....	15
7	Introduction to the blank detail specification .....	16
	Bibliography.....	17
	Table 1 – Transfer impedance.....	10
	Table 2 – Coupling attenuation.....	10
	Table 3 – Attenuation, constant values .....	11
	Table 4 – Return loss ( <i>RL</i> ).....	12

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**MULTICORE AND SYMMETRICAL PAIR/QUAD CABLES  
FOR DIGITAL COMMUNICATIONS –**

**Part 8: Symmetrical pair/quad cables  
with transmission characteristics up to 1 200 MHz –  
Work area wiring – Sectional specification**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 61156-8 has been prepared by subcommittee 46C: Wires and symmetric cables, of IEC technical committee 46: Cables, wires, waveguides, R.F. connectors, R.F. and microwave passive components and accessories.

The text of this standard is based on the following documents:

FDIS	Report on voting
46C/887/FDIS	46C/894/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 61156 series, under the general title: *Multicore and symmetrical pair/quad cables for digital communications*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.

The contents of the corrigendum of July 2009 have been included in this copy.
