About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 15 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	6
INTRODUCTION.....	8
1 Scope.....	9
2 Normative references.....	9
3 Terms, definitions, symbols and abbreviations.....	10
3.1 Terms and definitions.....	10
3.2 Symbols.....	17
3.3 Abbreviations.....	17
4 Fundamental requirements.....	18
4.1 General.....	18
4.2 Mechanical requirements.....	19
4.3 Accessible parts.....	19
4.4 Laser radiation.....	19
5 Protection against environmental influences.....	19
6 Equipotential bonding and earthing.....	19
6.1 General requirements.....	19
6.2 Equipotential bonding mechanisms.....	19
6.3 Equipotential bonding in meshed systems.....	30
6.3.1 References to other standards.....	30
6.3.2 General on AC mains.....	30
6.3.3 AC power distribution and connection of the protective conductor.....	30
6.3.4 Dangers and malfunction.....	30
6.3.5 Measures.....	31
7 Mains-supplied equipment.....	31
8 Remote power feeding in cable networks.....	32
8.1 Remote power feeding.....	32
8.1.1 Maximum allowed voltages.....	32
8.1.2 General requirements for equipment.....	32
8.1.3 Current-carrying capacity and dielectric strength of the components.....	32
8.2 Remote powering from subscriber premises.....	33
9 Protection against contact and proximity to electric power distribution systems.....	33
9.1 General.....	33
9.2 Overhead lines.....	33
9.2.1 Overhead lines up to 1 000 V.....	33
9.2.2 Overhead lines above 1 000 V.....	34
9.3 House installations up to 1 000 V.....	34
10 System outlets and transfer points.....	34
10.1 General.....	34
10.2 System outlet.....	35
10.2.1 Types of system outlets.....	35
10.2.2 Fully isolated system outlet.....	35
10.2.3 Semi-isolated system outlet.....	35
10.2.4 Non-isolated system outlet with protective element.....	35
10.2.5 Non-isolated system outlet without protective element.....	36
10.2.6 Fully-isolated system outlet provided by means of a FTTH system.....	36

10.3	Transfer point	36
11	Protection against atmospheric overvoltages and elimination of potential differences	37
11.1	General.....	37
11.2	Protection of the antenna system.....	38
11.2.1	Selection of appropriate methods for protection of antenna systems.....	38
11.2.2	Building equipped with a lightning protection system (LPS)	39
11.2.3	Building not equipped with an LPS	47
11.3	Earthing and bonding of the antenna system.....	51
11.3.1	Internal protection system	51
11.3.2	Earthing conductors	51
11.3.3	Earth termination system.....	54
11.4	Overvoltage protection	56
12	Mechanical stability	57
12.1	General requirements.....	57
12.2	Bending moment.....	58
12.3	Wind-pressure values.....	59
12.4	Mast construction.....	59
12.5	Data to be published	59
Annex A (informative)	Earth loop impedance	61
A.1	General.....	61
A.2	Earthing for fault conditions.....	61
A.3	Earthing to protect against hazardous touch voltage	62
A.4	Temporary safety measures	63
Annex B (informative)	Use of shield wires to protect installations with coaxial cables.....	64
B.1	General.....	64
B.2	Soil quality determines shield-wiring necessity.....	64
B.3	Protective measures against direct lightning strikes on under ground cables	64
Annex C (informative)	Differences in some countries	67
C.1	Subclause 6.1	67
C.1.1	France.....	67
C.1.2	Japan	67
C.2	Subclause 6.2.....	67
C.2.1	France.....	67
C.2.2	Norway	67
C.2.3	Japan and Poland	67
C.3	Subclause 6.3 – Norway.....	67
C.3.1	Justification	67
C.3.2	Equipotential bonding mechanism for cable networks.....	68
C.3.3	Use of galvanic isolation in a cable network with remote power-feeding.....	73
C.3.4	Use of voltage dependent protective device in a cable network	73
C.4	Subclause 8.1.1 – Japan	75
C.5	Subclause 9.1 – France.....	75
C.6	Subclause 9.2 – Japan	75
C.7	Subclause 10.1	75
C.7.1	Sweden	75
C.7.2	UK.....	75
C.8	Subclause 10.2 – Japan	75

C.9	Subclause 11.1 – Japan	76
C.10	Subclause 11.2	76
C.10.1	Germany	76
C.10.2	Japan	76
C.11	Subclause 11.3.2 – Japan	77
C.12	Subclause 11.3.3 – Japan	77
C.13	Subclause 12.2 – Japan	77
C.14	Subclause 12.3 – Finland	78
	Bibliography	79

Figure 1	– Example of equipotential bonding and earthing of a metal enclosure inside a non-conductive cabinet for outdoor-use	21
Figure 2	– Example of equipotential bonding of a building installation	22
Figure 3	– Example of equipotential bonding and indirect earthing of a metal enclosure inside a non-conductive cabinet for outdoor-use	23
Figure 4	– Example of equipotential bonding and earthing of a building installation (underground connection)	25
Figure 5	– Example of equipotential bonding and earthing of a building installation (above ground connection)	26
Figure 6	– Example of equipotential bonding with a galvanic isolated cable entering a building (underground connection)	27
Figure 7	– Example of maintaining equipotential bonding whilst a unit is removed	29
Figure 8	– MDU building installed with FTTH technology	36
Figure 9	– Areas of antenna-mounting in or on buildings, where earthing is not mandatory	38
Figure 10	– Flow chart for selection of the appropriate method for protecting the antenna system against atmospheric overvoltages	41
Figure 11	– Example of equipotential bonded headends and antennas in a protected volume of the building LPS	43
Figure 12	– Example of equipotential bonded headends and antennas in a protected volume of the building LPS	44
Figure 13	– Example of equipotential bonded headends and antennas in a protected volume of an external isolated ATS	45
Figure 14	– Example of equipotential bonded antennas (not installed in a protected volume) and headend with direct connection to building LPS	46
Figure 15	– Example of equipotential bonded headend and earthed antennas (building without LPS)	49
Figure 16	– Example of bonding for antennas and headend (building without LPS and lightning risk lower than or equal to the tolerable risk)	50
Figure 17	– Example of protecting an antenna system (not installed in a protected volume) by additional bonding conductors ($R > R_T$)	53
Figure 18	– Examples of earthing mechanisms (minimum dimensions)	56
Figure 19	– Example of an overvoltage protective device for single dwelling unit	57
Figure 20	– Example of bending moment of an antenna mast	58
Figure A.1	– Systematic of earth loop resistance	62
Figure B.1	– Principle of single shield wire	65
Figure B.2	– Principle of two shield wires	66
Figure C.1	– IT power distribution system in Norway	68

Figure C.2 – Example of installations located farther than 20 m away from a transforming station	69
Figure C.3 – Example of installations located closer than 20m from a transforming station	70
Figure C.4 – Example of cabinets for cable network with locally fed equipment and mains placed less than 2 m apart	71
Figure C.5 – Example of cabinets for cable network with remotely fed equipment and mains placed less than 2 m apart	71
Figure C.6 – Example of cabinets for cable network with locally fed equipment and mains placed more than 2 m apart	72
Figure C.7 – Example of cabinets for cable network with remotely fed equipment and mains placed more than 2m apart	72
Figure C.8 – Example of an installation placing the amplifier in front of the galvanic isolator	73
Figure C.9 – Example of protection using a voltage depending device on network installations on poles	74
Figure C.10 – Example of the installation of a safety terminal in Japan	76
Figure C.11 – Examples of installation of a lightning protection system in Japan	77
Table 1 – Maximum allowed operation voltages and maximum recommended currents for coaxial cables in the EN 50117 series	33
Table 2 – Solutions for protection of antenna systems against atmospheric overvoltages	39
Table B.1 – Conductivity of different types of soil	64
Table B.2 – Protection factors (K_p) of protection measures against direct lightning strokes for buried cables	65
