About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: www.iec.ch/webstore/custserv

A propos de la CEI

La Commission Electrotechnique internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: www.iec.ch/searchpub/cur_fut-f.htm

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: www.iec.ch/online_news/justpub

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: www.iec.ch/webstore/custserv/custserv_entry-f.htm

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Background	6
4 Overview of methods	7
5 Mapping functions	7
6 Reference test method	8
7 Apparatus.....	8
7.1 Light source	8
7.2 Modulation	8
7.3 Launch optics	8
7.4 Support and positioning apparatus	8
7.5 Cladding mode stripper	8
7.6 Deployment mandrel	9
7.6.1 General	9
7.6.2 Cable cut-off wavelength, Method A	9
7.6.3 Cable cut-off wavelength, Method B	9
7.6.4 Fibre cut-off wavelength, Method C	9
7.7 Detection optics	11
7.8 Detector assembly and signal detection electronics.....	11
8 Sampling and specimens.....	11
8.1 Specimen length.....	11
8.2 Specimen end face.....	12
9 Procedure	12
9.1 Positioning of specimen in apparatus	12
9.1.1 General requirements for all methods	12
9.1.2 Deployment requirements for each method	12
9.2 Measurement of output power	12
9.2.1 Overview	12
9.2.2 Bend-reference technique.....	13
9.2.3 Multimode-reference technique.....	13
10 Calculations	13
10.1 Bend-reference technique	13
10.2 Multimode-reference technique	14
10.3 Curve-fitting technique for improved precision (optional)	14
10.3.1 General	14
10.3.2 Step 1, define the upper-wavelength region.....	15
10.3.3 Step 2, characterize the attenuation curve.....	15
10.3.4 Step 3, determine the upper wavelength of the transition region	16
10.3.5 Step 4, determine the lower wavelength of the transition region.....	16
10.3.6 Step 5, characterize the transition region with the theoretical model.....	16
10.3.7 Step 6, compute the cut-off wavelength, λ_c	17
11 Results.....	17
11.1 Report the following information with each measurement:	17
11.2 The following information shall be available upon request:	17

12 Specification information	18
Annex A (normative) Requirements specific to method A – Cable cut-off wavelength, λ_{CC} , using uncabled fibre	19
Annex B (normative) Requirements specific to method B – Cable cut-off wavelength, λ_{CC} , using cabled fibre	20
Annex C (normative) Requirements specific to method C – Fibre cut-off wavelength, λ_C	21
Bibliography.....	22
Figure 1 – Deployment configuration for cable cut-off wavelength, method A	9
Figure 2 – Deployment configuration for cable cut-off wavelength, method B	10
Figure 3 – Default configuration to measure λ_C	10
Figure 4 – Deployment configurations for fibre cut-off measurement	11

INTERNATIONAL ELECTROTECHNICAL COMMISSION

OPTICAL FIBRES –

**Part 1-44: Measurement methods and test procedures –
Cut-off wavelength**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60793-1-44 has been prepared by subcommittee 86A: Fibres and cables, of IEC technical committee 86: Fibre optics.

This second edition cancels and replaces the first edition published in 2001. This edition constitutes a technical revision.

The main change with respect to the previous edition is the withdrawal of Annex D.

Annexes A, B and C form an integral part of this standard.

This standard should be read in conjunction with IEC 60793-1-1.

This bilingual edition corresponds to the monolingual English version, published in 2011-04.

The text of this standard is based on the following documents:

FDIS	Report on voting
86A/1369/FDIS	86A/1385/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

The French version of this standard has not been voted upon.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 60793-1-4x series, published under the general title *Optical fibres – Measurement methods and test procedures*, can be found on the IEC website

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
