About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

CONTENTS

FOREWORD.....	4
1 Scope.....	6
2 Normative references	6
3 Terms, definitions, symbols, units and abbreviated terms	6
3.1 Terms and definitions	6
3.2 Symbols, units and abbreviated terms	6
4 Basic transmission line equations.....	9
4.1 Introduction	9
4.2 Characteristic impedance and propagation coefficient equations.....	10
4.2.1 General	10
4.2.2 Propagation coefficient.....	10
4.2.3 Characteristic impedance	11
4.2.4 Phase and group velocity	12
4.3 High frequency representation of secondary parameters.....	13
4.4 Frequency dependence of the primary and secondary parameters	14
4.4.1 Resistance	14
4.4.2 Inductance.....	14
4.4.3 Characteristic impedance.....	15
4.4.4 Attenuation coefficient.....	15
4.4.5 Phase delay and group delay.....	16
5 Measurement of characteristic impedance.....	17
5.1 General.....	17
5.2 Open/short circuit single-ended impedance measurement made with a balun (reference method).....	18
5.2.1 Principle	18
5.2.2 Test equipment.....	18
5.2.3 Procedure.....	19
5.2.4 Expression of results.....	19
5.3 Function fitting the impedance magnitude and angle	20
5.3.1 General.....	20
5.3.2 Impedance magnitude	20
5.3.3 Function fitting the angle of the characteristic impedance.....	22
5.4 Characteristic impedance determined from measured phase coefficient and capacitance.....	22
5.4.1 General	22
5.4.2 Equations for all frequencies case and for high frequencies.....	22
5.4.3 Procedure for the measurement of the phase coefficient	23
5.4.4 Phase delay	25
5.4.5 Phase velocity	25
5.4.6 Procedure for the measurement of the capacitance	25
5.5 Determination of characteristic impedance using the terminated measurement method.....	25
5.6 Extended open/short circuit method using a balun but excluding the balun performance.....	26
5.6.1 Test equipment and cable-end preparation.....	26
5.6.2 Basic equations	26
5.6.3 Measurement principle	26

5.7	Extended open/short circuit method without using a balun.....	28
5.7.1	Basic equations and circuit diagrams.....	28
5.7.2	Measurement principle	30
5.8	Open/short impedance measurements at low frequencies with a balun.....	31
5.9	Characteristic impedance and propagation coefficient obtained from modal decomposition technique	32
5.9.1	General	32
5.9.2	Procedure.....	33
5.9.3	Measurement principle	33
5.9.4	Scattering matrix to impedance matrix	35
5.9.5	Expression of results	37
6	Measurement of return loss and structural return loss	37
6.1	General.....	37
6.2	Principle.....	37
7	Propagation coefficient effects due to periodic structural variation related to the effects appearing in the structural return loss	38
7.1	General.....	38
7.2	Equation for the forward echoes caused by periodic structural inhomogeneities	38
8	Unbalance attenuation.....	40
8.1	General.....	40
8.2	Unbalance attenuation near end and far end.....	40
8.3	Theoretical background	42
	Bibliography.....	46
	Figure 1 – Secondary parameters extending from 1 kHz to 1 GHz.....	16
	Figure 2 – Diagram of cable pair measurement circuit.....	19
	Figure 3 – Determining the multiplier of 2π radians to add to the phase measurement	24
	Figure 4 – Measurement configurations	27
	Figure 5 – Measurement principle with four terminal network theory	27
	Figure 6 – Admittance measurement configurations	30
	Figure 7 – Admittance measurement principle.....	30
	Figure 8 – Transmission line system	34
	Figure 9 – Differential-mode transmission in a symmetric pair.....	40
	Figure 10 – Common-mode transmission in a symmetric pair.....	40
	Figure 11 – Circuit of an infinitesimal element of a symmetric pair	43
	Figure 12 – Calculated coupling transfer function for a capacitive coupling of 0,4 pF/m and random $\pm 0,4$ pF/m ($\ell = 100$ m; $\epsilon_{r1} = \epsilon_{r2} = 2,3$).....	45
	Figure 13 – Measured coupling transfer function of 100 m Twinax 105 Ω	45
	Table 1 – Unbalance attenuation at near end.....	41
	Table 2 – Unbalance attenuation at far end.....	41
	Table 3 – Measurement set-up.....	42

INTERNATIONAL ELECTROTECHNICAL COMMISSION

MULTICORE AND SYMMETRICAL PAIR/QUAD CABLES FOR DIGITAL COMMUNICATIONS – PART 1-2: ELECTRICAL TRANSMISSION CHARACTERISTICS AND TEST METHODS OF SYMMETRICAL PAIR/QUAD CABLES

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

The main task of IEC technical committees is to prepare International Standards. However, a technical committee may propose the publication of a technical report when it has collected data of a different kind from that which is normally published as an International Standard, for example "state of the art".

IEC 61156-1-2, which is a technical report, has been prepared by subcommittee 46C: Wires and symmetric cables, of IEC technical committee 46: Cables, wires, waveguides, R.F. connectors, R.F. and microwave passive components and accessories.

The text of this technical report is based on the following documents:

Enquiry draft	Report on voting
46C/853/DTR	46C/889/RVC

Full information on the voting for the approval of this technical report can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts of the IEC 61156 series, under the general title: *Multicore and symmetrical pair/quad cables for digital communications*, can be found on the IEC website.

The committee has decided that the contents of this publication will remain unchanged until the maintenance result date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.

A bilingual version of this publication may be issued at a later date.
