About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search -

webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews, graphical symbols and the glossary. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 500 terminological entries in English and French, with equivalent terms in 25 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD	5
1 Scope	8
2 Normative references	8
3 Terms and definitions	9
4 Technical information	10
4.1 Recommended method of termination for connectors	10
4.2 Connector coding, number of contacts, ratings and characteristics	10
4.3 Systems of levels	10
4.3.1 Performance level	10
4.3.2 Compatibility levels, according to IEC 61076-1	10
4.4 Classification into climatic categories	10
4.5 Creepage and clearance distances	11
4.6 Current-carrying capacity	11
4.7 Marking	11
4.8 Safety aspects	11
5 Dimensional information	11
5.1 General	11
5.2 Fixed connectors	12
5.2.1 General	12
5.2.2 Style EM	12
5.2.3 Styles EF1 and EF2	13
5.3 Free connectors	15
5.3.1 General	15
5.3.2 Style JM	16
5.3.3 Style KM	16
5.3.4 Style NM	17
5.3.5 Style OM	17
5.3.6 Style LM	19
5.3.7 Style MM	20
5.3.8 Style JF	21
5.3.9 Style KF	21
5.3.10 Style NF	22
5.3.11 Style QF	23
5.3.12 Style LF	24
5.3.13 Style MF	25
5.4 Interface dimensions	26
5.4.1 Pin front and side view A-coding 3-way	26
5.4.2 Pin front and side view A-coding 4-way	27
5.4.3 Pin front and side view A-coding 6-way	28
5.4.4 Pin front and side view A-coding 8-way	30
5.4.5 Pin front and side view B-coding 5-way	31
5.4.6 Pin front and side view C-coding, 12-way	33
5.4.7 Pin side view for snap- and screw-, snap- and screw-locking	35
5.5 Engagement (mating) information	37
5.6 Gauges	39
5.6.1 Sizing gauges and retention force gauges	39
6 Characteristics	40

6.1	General	40
6.2	Pin assignment and other definitions	40
6.3	Classification into climatic categories.....	40
6.4	Electrical characteristics.....	41
6.4.1	Rated insulation voltage – Rated impulse voltage – Pollution degree.....	41
6.4.2	Voltage proof.....	41
6.4.3	Current-carrying capacity.....	42
6.4.4	Contact resistance	42
6.4.5	Insulation resistance	42
6.5	Mechanical characteristics.....	42
6.5.1	Mechanical operation	42
6.5.2	Insertion and withdrawal forces	43
6.5.3	Contact retention in insert.....	43
6.5.4	Polarizing and coding method	43
6.6	Other characteristics	44
6.6.1	Vibration (sinusoidal).....	44
6.6.2	Shock	44
6.6.3	Degree of protection provided by enclosures (IP code)	44
6.7	Environmental aspects - marking of insulation material (plastics).....	44
7	Test schedule.....	44
7.1	General	44
7.1.1	General aspects.....	44
7.1.2	Climatic category	44
7.1.3	Creepage and clearance distances	44
7.1.4	Arrangement for contact resistance measurement	45
7.1.5	Arrangement for dynamic stress tests	46
7.1.6	Wiring of specimens.....	47
7.2	Test schedules	47
7.2.1	Basic (minimum) test schedule	47
7.2.2	Full test schedule.....	47
Annex A (informative)	Recommended outer diameter of the female connector body.....	56
Annex B (informative)	Orientation of the cable outlet in relation to coding.....	57
Annex C (normative)	Dimension of connector inserts.....	58
C.1	General	58
C.2	Connector insert, with male contacts dip solder long version with screw- and snap-locking.....	58
C.3	Connector insert, with male contacts dip solder, short version with screw- and snap-locking	59

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**Connectors for electrical and electronic equipment -
Product requirements -
Part 2-104: Circular connectors - Detail specification for circular
connectors with M8 screw-locking or snap-locking**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) IEC draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). IEC takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, IEC had not received notice of (a) patent(s), which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at <https://patents.iec.ch>. IEC shall not be held responsible for identifying any or all such patent rights.

IEC 61076-2-104 has been prepared by subcommittee 48B: Electrical connectors, of IEC technical committee 48: Electrical connectors and mechanical structures for electrical and electronic equipment. It is an International Standard.

This third edition cancels and replaces the second edition published in 2014. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) The structure of this document has been adapted to the new IEC template for standards. New subclauses have been added. Clause 5 and Clause 6 have been updated.
- b) The mating face for a M8 12-pole connector has been added.

- c) Annex B Orientation of cable outlet in relation to coding has been added.
- d) The styles for connector inserts have been moved to the normative Annex C.

The text of this International Standard is based on the following documents:

Draft	Report on voting
48B/3188/FDIS	48B/3194/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1 and ISO/IEC Directives, IEC Supplement, available at www.iec.ch/members_experts/refdocs. The main document types developed by IEC are described in greater detail at www.iec.ch/publications.

A list of all parts of the IEC 61076 series, published under the general title *Connectors for electrical and electronic equipment - Product requirements*, can be found on the IEC website.

The committee has decided that the contents of this document will remain unchanged until the stability date indicated on the IEC website under webstore.iec.ch in the data related to the specific document. At this date, the document will be

- reconfirmed,
- withdrawn, or
- revised.
