About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC online collection - oc.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 000 terminological entries in English and French, with equivalent terms in 18 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Recherche de publications IEC -

webstore.iec.ch/advsearchform

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études, ...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et une fois par mois par email.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: sales@iec.ch.

IEC online collection - oc.iec.ch

Découvrez notre puissant moteur de recherche et consultez gratuitement tous les aperçus des publications. Avec un abonnement, vous aurez toujours accès à un contenu à jour adapté à vos besoins.

Electropedia - www.electropedia.org

Le premier dictionnaire d'électrotechnologie en ligne au monde, avec plus de 22 000 articles terminologiques en anglais et en français, ainsi que les termes équivalents dans 16 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

CONTENTS

FOREWORD..... 6

INTRODUCTION..... 8

1 Scope..... 11

2 Normative references 11

3 Terms and definitions 11

4 Abbreviated terms 19

5 General discussion of earthquake environment and equipment response..... 20

 5.1 General..... 20

 5.2 Earthquake environment 20

 5.3 Equipment on foundations..... 20

 5.4 Equipment on structures 20

 5.5 Interfaces and adverse interactions..... 21

 5.6 Simulating vibration induced by an earthquake 21

 5.6.1 General 21

 5.6.2 Response spectrum 21

 5.6.3 Time history..... 22

 5.6.4 PSD function 22

 5.7 Damping 22

 5.7.1 General 22

 5.7.2 Measurement of damping 23

 5.8 Application of damping..... 23

 5.8.1 General 23

 5.8.2 Application of damping in testing 23

 5.8.3 Application of damping in analysis 24

6 Seismic qualification requirements..... 24

 6.1 General..... 24

 6.2 Specification of equipment to be qualified 25

 6.3 Specification of ageing condition..... 25

 6.4 Specification of seismic requirements 25

 6.5 Specification of acceptance criteria..... 25

7 Seismic qualification approach 26

 7.1 Safety function..... 26

 7.2 Seismic qualification methods 26

8 Ageing..... 27

 8.1 General..... 27

 8.2 Thermal ageing..... 28

 8.3 Radiation ageing..... 28

 8.4 Material degradation and corrosion 28

 8.5 Mechanical or electrical cycle ageing 28

 8.6 Vibration ageing..... 28

 8.6.1 General 28

 8.6.2 Ageing from non-seismic vibration conditions 29

 8.6.3 Hydrodynamic loads 29

 8.6.4 Seismic ageing (OBE/S1) 29

9 Testing 29

 9.1 General..... 29

9.1.1	Test programme	29
9.1.2	Mounting	31
9.1.3	Monitoring	31
9.1.4	Loading	31
9.1.5	Refurbishment	32
9.1.6	Exploratory tests.....	32
9.1.7	Seismic ageing (OBE/S1)	34
9.2	Proof and generic testing	34
9.3	Fragility testing	35
9.4	Component testing.....	35
9.5	Assembly testing.....	35
9.5.1	General	35
9.6	Test methods	36
9.6.1	General	36
9.6.2	Single-frequency test.....	37
9.6.3	Multiple-frequency tests.....	40
9.6.4	Other tests.....	45
9.6.5	Test duration and low-cycle fatigue potential	45
9.6.6	Multi-axis tests	45
9.6.7	Line-mounted equipment	47
9.6.8	Additional tests.....	48
9.7	Test documentation	48
10	Qualification by similarity.....	48
10.1	General.....	48
10.2	Excitation.....	48
10.3	Physical systems	48
10.4	Safety function.....	49
11	Analysis.....	49
11.1	General.....	49
11.2	Seismic analysis methods	50
11.2.1	General	50
11.2.2	Static analysis	51
11.2.3	Static coefficient analysis	51
11.2.4	Dynamic analysis.....	51
11.3	Nonlinear equipment response.....	52
11.4	Other dynamic loads	52
11.5	Seismic analysis results	52
11.6	Documentation of analysis	53
12	Combined analysis and testing	53
12.1	General.....	53
12.2	Modal testing	53
12.2.1	General	53
12.2.2	Normal-mode method	53
12.2.3	Transfer-function method.....	54
12.2.4	Analytical methods utilizing test data	54
12.2.5	Qualification	54
12.3	Extrapolation for similar equipment	54
12.3.1	General	54
12.3.2	Test method	54

12.3.3	Analysis.....	55
12.4	Shock testing.....	55
12.5	Extrapolation for multi-cabinet assemblies.....	55
12.6	Other test/analysis.....	55
13	Documentation.....	56
13.1	General.....	56
13.2	Seismic qualification report.....	56
13.2.1	General.....	56
13.2.2	Analysis.....	56
13.2.3	Testing.....	56
13.2.4	Combined analysis and testing or similarity.....	57
Annex A (normative)	Experience-based seismic qualification.....	58
A.1	General.....	58
A.2	Earthquake experience data.....	58
A.2.1	General.....	58
A.2.2	Characterization of the earthquake experience motions.....	58
A.2.3	Earthquake experience spectrum (EES).....	59
A.2.4	Characterization of reference equipment class.....	59
A.2.5	Qualification of candidate equipment.....	61
A.3	Test experience data.....	62
A.3.1	General.....	62
A.3.2	Characterization of test experience input motions.....	62
A.3.3	Test experience spectra (TES).....	62
A.3.4	Characterization of reference equipment class.....	63
A.3.5	Qualification of candidate equipment.....	64
A.4	Special considerations.....	64
A.4.1	Inherently rugged equipment.....	64
A.4.2	Limitations.....	65
A.5	Experience-based documentation.....	65
A.5.1	General.....	65
A.5.2	Reference data.....	66
A.5.3	Candidate equipment qualification.....	66
Annex B (informative)	Measurement of zero period acceleration.....	67
Annex C (informative)	Frequency content and stationarity.....	68
Annex D (informative)	Fragility testing.....	69
D.1	General.....	69
D.2	Excitation motion.....	69
D.3	Application of results.....	70
D.4	Other considerations.....	70
Annex E (informative)	Test duration and number of cycles.....	72
Annex F (informative)	Statistically independent motions.....	76
Annex G (informative)	Seismic qualification illustrative flowcharts.....	77
G.1	General.....	77
G.2	Establishment of seismic conditions and acceptance criteria.....	77
G.3	Qualification by testing.....	77
G.4	Qualification by analysis.....	77
G.5	Qualification by combination of analysis and testing.....	77
Bibliography	82

Figure 1 – Sine beat 39

Figure 2 – Decaying sine 39

Figure 3 – Random spectrum with superimposed sine beats 43

Figure 4 – Resonant amplification versus cycles per beat 44

Figure E.1 – Fractional cycles to obtain one equipment maximum peak cycle 73

Figure E.2 – Equivalent peak-stress cycles induced by stationary random motion 74

Figure E.3 – Equivalent peak-stress cycles induced by stationary random motion to 20 Hz... 74

Figure G.1 – Seismic qualification flowchart..... 78

Figure G.2 – Seismic qualification test flowchart 79

Figure G.3 – Seismic qualification analysis flowchart 80

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**NUCLEAR FACILITIES –
EQUIPMENT IMPORTANT TO SAFETY –
SEISMIC QUALIFICATION**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation.

IEEE Standards documents are developed within IEEE Societies and Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. IEEE develops its standards through a consensus development process, which brings together volunteers representing varied viewpoints and interests to achieve the final product. Volunteers are not necessarily members of IEEE and serve without compensation. While IEEE administers the process and establishes rules to promote fairness in the consensus development process, IEEE does not independently evaluate, test, or verify the accuracy of any of the information contained in its standards. Use of IEEE Standards documents is wholly voluntary. *IEEE documents are made available for use subject to important notices and legal disclaimers (see <http://standards.ieee.org/ipr/disclaimers.html> for more information).*

IEC collaborates closely with IEEE in accordance with conditions determined by agreement between the two organizations.

- 2) The formal decisions of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees. The formal decisions of IEEE on technical matters, once consensus within IEEE Societies and Standards Coordinating Committees has been reached, is determined by a balanced ballot of materially interested parties who indicate interest in reviewing the proposed standard. Final approval of the IEEE standards document is given by the IEEE Standards Association (IEEE-SA) Standards Board.
- 3) IEC/IEEE Publications have the form of recommendations for international use and are accepted by IEC National Committees/IEEE Societies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC/IEEE Publications is accurate, IEC or IEEE cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications (including IEC/IEEE Publications) transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC/IEEE Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and IEEE do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC and IEEE are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or IEEE or their directors, employees, servants or agents including individual experts and members of technical committees and IEC National Committees, or volunteers of IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board, for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC/IEEE Publication or any other IEC or IEEE Publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that implementation of this IEC/IEEE Publication may require use of material covered by patent rights. By publication of this standard, no position is taken with respect to the existence or validity of any patent rights in connection therewith. IEC or IEEE shall not be held responsible for identifying Essential Patent Claims for which a license may be required, for conducting inquiries into the legal validity or scope of Patent Claims or determining whether any licensing terms or conditions provided in connection with submission of a Letter of Assurance, if any, or in any licensing agreements are reasonable or non-discriminatory. Users of this standard are expressly advised that determination of the validity of any patent rights, and the risk of infringement of such rights, is entirely their own responsibility.

International Standard IEC/IEEE 60980-344 has been prepared by subcommittee 45A: Instrumentation, control and electrical power systems of nuclear facilities, of IEC technical committee 45: Nuclear instrumentation, in cooperation with Nuclear Power Engineering Committee of the IEEE, under the IEC/IEEE Dual Logo Agreement.

It is published as an IEC/IEEE dual logo standard.

This new edition cancels and replaces the first edition of IEC 60980, published in 1989, and constitutes a technical revision. It also supersedes IEEE Std 344™-2013.

The text of this standard is based on the following IEC documents:

FDIS	Report on voting
45A/1323/FDIS	45A/1334/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table.

International standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The IEC Technical Committee and IEEE Technical Committee have decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
