About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: www.iec.ch/webstore/custserv

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: www.iec.ch/searchpub/cur_fut-f.htm

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: www.iec.ch/online_news/justpub

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: www.iec.ch/webstore/custserv/custserv_entry-f.htm

CONTENTS

FOREWORD.....	18
INTRODUCTION.....	20
1 Scope.....	22
2 Normative references	22
3 Terms, definitions, symbols, abbreviations and conventions	23
3.1 Reference model terms and definitions	23
3.2 Terms and definitions from ISO/IEC 7498-1 terms	23
3.2.1 Terms and definitions from ISO/IEC 9545	24
3.2.2 Terms and definitions from ISO/IEC 8824	24
3.2.3 Terms and definitions from ISO/IEC 8825	24
3.3 Specific terms and definitions	24
3.4 Abbreviations.....	33
3.5 Conventions.....	35
3.5.1 Conventions used for service.....	35
3.5.2 Conventions used for DL-protocol (state machine).....	36
3.5.3 Conventions for Application Layer service	36
3.5.4 Conventions for the AL-protocol	39
4 Physical layer specification and service definition.....	44
4.1 Physical layer service definition	44
4.1.1 General overview.....	44
4.1.2 Physical layer services	44
4.2 Physical layer protocol specification.....	48
5 Data-link layer service definition – Type 20 elements	48
5.1 Data-link layer services.....	48
5.1.1 Facilities of the data-link layer services	48
5.1.2 QoS for message service.....	49
5.1.3 Sequence of primitives	50
5.1.4 DL-TRANSMIT service	52
5.1.5 DL-RECEIVE service	54
5.1.6 DL-DISCONNECT service	55
5.1.7 DL-PATH-FAILURE service	55
5.1.8 DL-ADVERTISE service.....	55
5.1.9 DL-NEIGHBOR service.....	56
5.1.10 DLM-SET	56
5.1.11 DLM-GET	57
5.1.12 DLM-ACTION	58
5.1.13 DLM-EVENT.....	59
5.2 Network layer services	59
5.2.1 Facilities of the network layer services	59
5.2.2 QoS for message service.....	59
5.2.3 Sequence of primitives	60
5.2.4 NL-TRANSMIT Service	60
5.2.5 NLM-SET	61
5.2.6 NLM-GET	62
5.2.7 NLM-ACTION	63
5.3 Transport layer services.....	64

5.3.1	Facilities of the transport layer services.....	64
5.3.2	QoS for message service.....	64
5.3.3	Sequence of primitives	65
5.3.4	TL-DATA-TRANSFER Service.....	66
5.3.5	TL-DATA-EXCHANGE Service	68
5.3.6	TLM-SET	69
5.3.7	TLM-GET	70
6	Data-link layer protocol specification – Type 20 elements.....	71
6.1	Overview	71
6.1.1	Data-link layer operation.....	71
6.1.2	Network layer operation.....	74
6.1.3	Device procedures.....	76
6.2	Logical link control.....	76
6.2.1	General DLPDU structure	76
6.2.2	DLPDU-specific structure, encoding and elements of procedure	79
6.2.3	DLPDU Priority and Flow Control.....	84
6.2.4	Error detection and security.....	85
6.3	Medium Access Control	86
6.3.1	Function	86
6.3.2	Slot timing	87
6.3.3	Communication tables and buffers.....	89
6.3.4	Link scheduling.....	95
6.3.5	MAC operation	100
6.4	DL-management-information	112
6.4.1	General	112
6.4.2	DL attributes.....	112
6.4.3	DLM actions	113
6.5	Network layer.....	113
6.5.1	Two level model of NL	113
6.5.2	NPDU structure	116
6.5.3	Security function.....	118
6.5.4	Network layer tables	123
6.5.5	NLE machine	126
6.5.6	NLE elements of procedure	128
6.5.7	NL-management information.....	131
6.6	Transport layer	133
6.6.1	General	133
6.6.2	TPDU structure.....	133
6.6.3	Transport pipe table	134
6.6.4	TLE elements of procedure.....	134
6.6.5	TLE state machines	137
6.6.6	TL-management information	140
7	Application layer service definition – Type 20 elements	141
7.1	Common concepts	141
7.2	Data type ASE	141
7.2.1	Overview	141
7.2.2	Formal definition of data type objects	143
7.2.3	FAL defined data types.....	145
7.2.4	Data type ASE service specification	148

7.2.5	Summary of data types	148
7.3	Communication model specification	149
7.3.1	Common parameters	149
7.3.2	ASEs	150
7.3.3	ARs	217
7.3.4	Summary of classes	220
7.3.5	Permitted services by AREP role	220
8	Application layer protocol specification – Type 20 elements	221
8.1	Abstract syntax	221
8.2	Transfer syntax	221
8.2.1	Common APDU fields	221
8.2.2	Common APDU structure	222
8.2.3	Device application service-specific APDU structures	225
8.2.4	Layer management service specific APDU structures	249
8.2.5	Gateway and network manager specific APDU structures	291
8.2.6	Network management configuration specific APDU structures	303
8.2.7	Data coding rules	319
8.3	Common procedures	324
8.3.1	Delayed response	324
8.3.2	Response time	327
8.4	FAL service protocol machine (FSPM)	328
8.4.1	General	328
8.4.2	FSPM state tables	328
8.4.3	Functions used by FSPM	330
8.4.4	Parameters of FSPM/ARPM primitives	331
8.5	Application relationship protocol machines (ARPMs)	332
8.5.1	AREP mapping to transport layer	332
8.5.2	Application relationship protocol machines (ARPMs)	333
8.5.3	AREP state machine primitive definitions	335
8.5.4	AREP state machine functions	336
8.6	TL mapping protocol machine (TMPM)	336
8.6.1	TMPM states	336
8.6.2	TMPM state machines	336
8.6.3	Primitives exchanged between transport layer and TMPM	337
8.6.4	Functions used by TMPM	337
9	Communication Profile Family 9 (HART™)	338
9.1	General Overview	338
9.2	Profile 9/1	338
9.3	Profile 9/2	338
9.3.1	Conformance statement	338
9.3.2	Device types	339
9.3.3	Physical layer	342
9.3.4	Data-link layer	346
9.3.5	Application layer	347
Annex A	(normative) Security	355
Annex B	(normative) Wireless procedures	368
Annex C	(normative) Network management	372
Annex D	(normative) Gateway	376

Annex E (normative) Command response codes	381
Annex F (normative) Common tables	390
Annex G (informative) Application of publish data mode and event commands.....	404
Annex H (informative) Network redundancy	408
Annex I (informative) Network manager implementation.....	409
Annex J (informative) Gateway implementation.....	433
Annex K (informative) Handheld device	444
Bibliography.....	446
Figure 1 – Superframe class example	41
Figure 2 – Inheritance example.....	42
Figure 3 – Basic aggregation example	43
Figure 4 – Composition aggregation example	43
Figure 5 – Physical layer service sequences.....	45
Figure 6 – Message service error-free sequences.....	51
Figure 7 – Message service sequences with errors	52
Figure 8 – Receive only message service	52
Figure 9 – NLL Data transfer service sequences.....	60
Figure 10 – Data transfer service error-free sequences.....	65
Figure 11 – Data transfer service sequences with errors.....	66
Figure 12 – A TDMA slot and superframe	72
Figure 13 – Channel hopping	73
Figure 14 – Wireless network.....	75
Figure 15 – DLPDU Structure	76
Figure 16 – Address specifier	76
Figure 17 – Construction of 8-octet EUI-64 Address.....	78
Figure 18 – DLPDU specifier.....	78
Figure 19 – Slot timing details.....	87
Figure 20 – DLE tables and relationship	90
Figure 21 – Relationships used for link scheduling.....	97
Figure 22 – MAC components.....	100
Figure 23 – TDMA state machine	102
Figure 24 – XMIT state machine	106
Figure 25 – RECV state machine	109
Figure 26 – ACK transmission state machine.....	111
Figure 27 – Graph routing.....	114
Figure 28 – Source routing.....	115
Figure 29 – NPDU Structure	116
Figure 30 – NPDU control octet	116
Figure 31 – Security control octet	118
Figure 32 – NLE tables and relationship	124
Figure 33 – NLE state machine.....	127
Figure 34 – Routing decision of the NPDU	130

Figure 35 – TPDU Structure	133
