About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

- Catalogue of IEC publications: www.iec.ch/searchpub

The IEC on-line Catalogue enables you to search by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, withdrawn and replaced publications.

- IEC Just Published: www.iec.ch/online_news/justpub

Stay up to date on all new IEC publications. Just Published details twice a month all new publications released. Available on-line and also by email.

- Electropedia: www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 20 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary online.

- Customer Service Centre: www.iec.ch/webstore/custserv

If you wish to give us your feedback on this publication or need further assistance, please visit the Customer Service Centre FAQ or contact us:

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

- Catalogue des publications de la CEI: www.iec.ch/searchpub/cur_fut-f.htm

Le Catalogue en-ligne de la CEI vous permet d'effectuer des recherches en utilisant différents critères (numéro de référence, texte, comité d'études,...). Il donne aussi des informations sur les projets et les publications retirées ou remplacées.

- Just Published CEI: www.iec.ch/online_news/justpub

Restez informé sur les nouvelles publications de la CEI. Just Published détaille deux fois par mois les nouvelles publications parues. Disponible en-ligne et aussi par email.

- Electropedia: www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International en ligne.

- Service Clients: www.iec.ch/webstore/custserv/custserv_entry-f.htm

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	8
2 Normative references	8
3 Terms and definitions	10
3.1 General.....	10
3.2 DC systems of distribution.....	11
3.3 AC systems of distribution	11
3.4 Protection.....	11
3.5 Equipment.....	13
4 General requirements	14
4.1 Ratings.....	14
4.2 Ambient air and cooling water temperature.....	14
4.3 Inclination of vessel.....	15
4.4 Voltage and frequency variations.....	15
4.5 Electrical power sources.....	16
4.6 Equipment.....	19
4.7 Electrical equipment and enclosures.....	19
4.8 Plugs and socket-outlets	21
4.9 Battery installation.....	22
4.10 Battery chargers.....	23
4.11 Internal communication circuits	23
4.12 Electrical apparatus for explosive gas atmospheres	23
4.13 Electrical fittings and cables attached to structures of another metal	24
4.14 Navigation lights supply.....	24
4.15 Luminaires	24
4.16 Electrical heating and cooking appliances	24
4.17 Magnetic compasses.....	24
5 Distribution systems	24
5.1 DC distribution systems.....	24
5.2 Standard a.c. distribution systems.....	24
5.3 Bonding conductors.....	25
5.4 Balance of loads in three-phase a.c. systems.....	26
5.5 Shore connection arrangements	26
6 Protection against electric shock in a.c. systems with voltage exceeding 50 V.....	27
6.1 Protection against direct contact	27
6.2 Automatic disconnection of supply to final circuit or equipment.....	27
6.3 Earthed neutral systems.....	27
6.4 Non-neutral earthed system (IT-type system)	27
6.5 Use of class II equipment	28
7 Protection against over-current and fault-current	28
7.1 General.....	28
7.2 Characteristics of protective devices	28
7.3 DC system.....	28
7.4 AC system.....	29

7.5	Generators	29
7.6	Transformers	29
7.7	Motor protection	30
8	Diversity (demand) factor	30
8.1	Circuits other than final circuits	30
8.2	Application of diversity (demand) factors	30
8.3	Final circuits	30
8.4	Motor power circuits	30
9	Cables	30
9.1	Selection of cables	30
9.2	Determination of the cross-sectional areas of conductors	31
10	Cable and wiring installation and termination	35
10.1	Earth bonds	35
10.2	Cable terminations	36
10.3	Cable and conductor installation	36
10.4	DC and AC cabling and wiring segregation	37
10.5	Conductor identification	38
10.6	Lightning protection	38
11	Testing	39
11.1	General	39
11.2	Earthing	39
11.3	Insulation resistance	39
11.4	Switchgear and controlgear	40
11.5	Voltage drop	40
11.6	Internal communication circuits	40
11.7	Lighting, heating and galley equipment	40
12	Vessels over 24 m in length	40
12.1	Essential services	40
12.2	Capacity of the batteries	41
12.3	Earthing	41
12.4	Segregation of circuits	41
12.5	Battery charger protection	41
12.6	Protection against over current and fault current – Special applications	41
12.7	Navigation light supply	41
12.8	Radio and navigation equipment	42
12.9	Navigation, control, instrumentation and communication systems	42
12.10	Electric and electro-hydraulic steering gear	42
12.11	Electromagnetic compatibility	42
	Annex A (informative) Power supply arrangements	43
	Bibliography	48
	Figure A.1 – Direct connection to a single phase mains supply	45
	Figure A.2 – Direct connection to a single phase mains supply with an isolating transformer on the vessel	45
	Figure A.3 – Direct connection to a three phase mains supply	46

Figure A.4 – Direct connection to a three phase mains supply with an isolating transformer on the vessel	46
Figure A.5 – Connection to a single phase supply through a shore-mounted isolating transformer	47
Table 1 – Design parameters – Temperature	14
Table 2 – Angular deviation and motion	15
Table 3 – AC voltages and frequencies for vessel's service systems of supply.....	16
Table 4 – Degree of protection in accordance with IEC 60529	20
Table 5 – Minimum clearances and creepage distances for bare busbars	21
Table 6 – Reference currents for calculation of minimum ventilation	23
Table 7 – Recommended current ratings for single core cables in continuous service (ambient temperature 45 °C).....	33
Table 8 – Correction factors for various ambient air temperatures.....	34
Table 9 – Correction factors for half-hour and one-hour service.....	34

Withdrawing

INTERNATIONAL ELECTROTECHNICAL COMMISSION

ELECTRICAL INSTALLATIONS IN SHIPS –**Part 507: Small vessels****FOREWORD**

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC provides no marking procedure to indicate its approval and cannot be rendered responsible for any equipment declared to be in conformity with an IEC Publication.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard IEC 60092-507 has been prepared by IEC technical committee 18: Electrical installations of ships and of mobile and fixed offshore units.

This second edition cancels and replaces the first edition published in 2000 and constitutes a technical revision.

This second edition includes the following significant technical changes with respect to the previous edition:

- a) DC, AC single phase, and AC 3-phase systems are now included in one document.
- b) The standard now specifies requirements for electrical installations relevant to all small commercial or leisure vessels up to 50 m or which have a Gross Registered Tonnage (GRT) not exceeding 500 GRT designed for use on inland waters or at sea.
