About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

Useful links:

IEC publications search - www.iec.ch/searchpub

The advanced search enables you to find IEC publications by a variety of criteria (reference number, text, technical committee,...).

It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available on-line and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing more than 30 000 terms and definitions in English and French, with equivalent terms in additional languages. Also known as the International Electrotechnical Vocabulary (IEV) on-line.

Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de la CEI

La Commission Electrotechnique Internationale (CEI) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications CEI

Le contenu technique des publications de la CEI est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente. un corrigendum ou amendement peut avoir été publié.

Liens utiles:

Recherche de publications CEI - www.iec.ch/searchpub

La recherche avancée vous permet de trouver des publications CEI en utilisant différents critères (numéro de référence, texte, comité d'études,...).

Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

Just Published CEI - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications de la CEI. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne au monde de termes électroniques et électriques. Il contient plus de 30 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans les langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (VEI) en ligne.

Service Clients - webstore.iec.ch/csc

Si vous désirez nous donner des commentaires sur cette publication ou si vous avez des questions contactez-nous: csc@iec.ch.

CONTENTS

FOREWORD.....	5
1 Scope.....	7
2 Normative references	7
3 Terms, definitions and abbreviations	8
3.1 Terms and definitions	8
3.2 Abbreviations	12
4 Classification of equipment.....	14
5 Requirements	14
6 Measurements.....	14
6.1 General.....	14
6.2 Host systems and modular EUT	15
6.3 Measurement procedure.....	16
7 Equipment documentation	16
8 Applicability.....	16
9 Test report.....	17
10 Compliance with this publication.....	18
11 Measurement uncertainty	18
Annex A (normative) Requirements.....	19
Annex B (normative) Exercising the EUT during measurement and test signal specifications.....	27
Annex C (normative) Measurement procedures, instrumentation and supporting information.....	32
Annex D (normative) Arrangement of EUT, local AE and associated cabling	46
Annex E (informative) Prescan measurements.....	61
Annex F (informative) Test report contents summary	62
Annex G (informative) Support information for the measurement procedures defined in C.4.1.1.....	63
Bibliography.....	79
Figure 1 – Examples of ports	11
Figure 2 – Example of a host system with different types of modules	15
Figure A.1 – Graphical representation of the limits for the AC mains power port defined in Table A.9	19
Figure C.1 – Measurement distance.....	33
Figure C.2 – Boundary of EUT, Local AE and associated cabling.....	34
Figure C.3 – Decision tree for using different detectors with quasi peak and average limits.....	35
Figure C.4 – Decision tree for using different detectors with peak and average limits.....	36
Figure C.5 – Decision tree for using different detectors with a quasi-peak limit	36
Figure C.6 – Calibration fixture	43
Figure C.7 – Circuit arrangement for measurement of emission voltages at TV/FM broadcast receiver tuner ports	44
Figure C.8 – Circuit arrangement for the measurement of the wanted signal and emission voltage at the RF modulator output port of an EUT.....	45

Figure D.1 – Example measurement arrangement for table-top EUT (Conducted and radiated emission) (Top view)	52
Figure D.2 – Example measurement arrangement for table-top EUT (Conducted emission measurement – alternative 1)	53
Figure D.3 – Example measurement arrangement for table-top EUT (Conducted emission measurement – alternative 2)	54
Figure D.4 – Example measurement arrangement for table-top EUT measuring in accordance with C.4.1.6.4	55
Figure D.5 – Example measurement arrangement for table-top EUT (Conducted emission measurement – alternative 2, showing AAN position)	56
Figure D.6 – Example measurement arrangement for floor standing EUT (Conducted emission measurement)	57
Figure D.7 – Example measurement arrangement for combinations of EUT (Conducted emission measurement)	58
Figure D.8 – Example measurement arrangement for table-top EUT (Radiated emission measurement)	58
Figure D.9 – Example measurement arrangement for floor standing EUT (Radiated emission measurement)	59
Figure D.10 – Example measurement arrangement for combinations of EUT (Radiated emission measurement)	60
Figure G.1 – Example AAN for use with unscreened single balanced pairs	63
Figure G.2 – Example AAN with high LCL for use with either one or two unscreened balanced pairs	64
Figure G.3 – Example AAN with high LCL for use with one, two, three, or four unscreened balanced pairs	65
Figure G.4 – Example AAN, including a 50 Ω source matching network at the voltage measuring port, for use with two unscreened balanced pairs	66
Figure G.5 – Example AAN for use with two unscreened balanced pairs	67
Figure G.6 – Example AAN, including a 50 Ω source matching network at the voltage measuring port, for use with four unscreened balanced pairs	68
Figure G.7 – Example AAN for use with four unscreened balanced pairs	69
Figure G.8 – Example AAN for use with coaxial cables, employing an internal common mode choke created by bifilar winding an insulated centre-conductor wire and an insulated screen-conductor wire on a common magnetic core (for example, a ferrite toroid)	70
Figure G.9 – Example AAN for use with coaxial cables, employing an internal common mode choke created by miniature coaxial cable (miniature semi-rigid solid copper screen or miniature double-braided screen coaxial cable) wound on ferrite toroids	70
Figure G.10 – Example AAN for use with multi-conductor screened cables, employing an internal common mode choke created by bifilar winding multiple insulated signal wires and an insulated screen-conductor wire on a common magnetic core (for example, a ferrite toroid)	71
Figure G.11 – Example AAN for use with multi-conductor screened cables, employing an internal common mode choke created by winding a multi-conductor screened cable on ferrite toroids	72
Figure G.12 – Basic circuit for considering the limits with defined common mode impedance of 150 Ω	75
Figure G.13 – Basic circuit for the measurement with unknown common mode impedance	75
Figure G.14 – Impedance layout of the components in the method described in C.4.1.6.3	76

Figure G.15 – Basic measurement setup to measure combined impedance of the 150 Ω and ferrites 78

Table 1 – Required highest frequency for radiated measurement 17

Table A.1 – Radiated emissions, basic standards and the limitation of the use of particular methods 20

Table A.2 – Requirements for radiated emissions at frequencies up to 1 GHz for Class A equipment 21

Table A.3 – Requirements for radiated emissions at frequencies above 1 GHz for Class A equipment 21

Table A.4 – Requirements for radiated emissions at frequencies up to 1 GHz for Class B equipment 21

Table A.5 – Requirements for radiated emissions at frequencies above 1 GHz for Class B equipment 22

Table A.6 – Requirements for radiated emissions from FM receivers 22

Table A.7 – Conducted emissions, basic standards and the limitation of the use of particular methods 23

Table A.8 – Requirements for conducted emissions from the AC mains power ports of Class A equipment 23

Table A.9 – Requirements for conducted emissions from the AC mains power ports of Class B equipment 24

Table A.10 – Requirements for asymmetric mode conducted emissions from Class A equipment 24

Table A.11 – Requirements for asymmetric mode conducted emissions from Class B equipment 25

Table A.12 – Requirements for conducted differential voltage emissions from Class B equipment 26

Table B.1 – Methods of exercising displays and video ports 28

Table B.2 – Display and video parameters 28

Table B.3 – Methods used to exercise ports 29

Table B.4 – Examples of digital broadcast signal specifications 30

Table C.1 – Analogue/digital data port emission procedure selection 38

Table C.2 – LCL values 39

Table C.3 – 5 m OATS/SAC NSA figures 45

Table D.1 – Arrangement spacing, distances and tolerances 48

Table F.1 – Summary of information to include in a test report 62

Table G.1 – Summary of advantages and disadvantages of the procedures described in C.4.1.6 73

INTERNATIONAL ELECTROTECHNICAL COMMISSION

**ELECTROMAGNETIC COMPATIBILITY
OF MULTIMEDIA EQUIPMENT –****Emission requirements**

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as "IEC Publication(s)"). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard CISPR 32 has been prepared by CISPR subcommittee 1: Electromagnetic compatibility of information technology equipment, multimedia equipment and receivers.

The text of this publication is based on the following documents:

FDIS	Report on voting
CIS/1/391/FDIS	CIS/1/398/RVD

Full information on the voting for the approval of this publication can be found in the report on voting indicated in the above table.

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.
